

“ATON” TRUE CELL, ATOM AND PARTICLE CONCEPT AND TRUE LAWS AND EQUATIONS OF CREATION

Dr. Ilija Lakicevic, Res. Prof.

Abstract

The true concept of the cell has been experimentally proven and many astonishing conclusions have been drawn. Accepting under microscope observed fact that the balanced red blood cells are microscopic light rings with holes in it, a section of a living cell has been emulated by placing a copper ring into a water solution of the ordinary table salt, sodium-chloride, and the charged condition of a living body, of which the cell is a part, has been emulated by placing two insulated wires with bared electrodes close together in the center of the ring and connecting the wires with a battery of 1.543 V. With the battery switched on the zero electric potential in the center of the ring has been measured. At a half distance from the center to the ring in the four orthogonal radial directions in the equatorial plane of the ring the same values of the electric potential of 0.48 V have been measured and at the ring itself the same measured values of the electric potential in the four orthogonal radial directions have been measured 0.84 V.

From the measured results and the axiom that the universal balance is infinite and eternal for it is ONE – singular quality - as well as using the consistent logical reasoning, the following main conclusions have been drawn: **in the center of every cell, atom and particle there is a still point of zero electric potential which is the zero point of the universal space and the universal Mind point** (vacuum does not exist more anywhere in the universe since vacuum is filled with potentials for anything, what is called SPACE); **the still point is the source of energy; energy is stillness of the eternal space of the still universe at rest and it is changeless; cell, atom and particle are consisting of light rings spinning around the centering Mind point; heat is born from cold; science is spiritual since the Spirit is centering every piece of matter; motion and matter are an illusion which is caused by division of the WHOLE into PARTS; Man’s Mind is one with God’s Mind; human beings are consciousness who create illusion of motion through thinking; consciousness is eternally integrating and controlling existence by moving perception; desire of the Mind for creative expression is motivating force of every human action; energy E cannot be neither moved nor released but expressed in electric potential P according to the equation $E = P_{+} \cdot C^2 / \sqrt{1-(v/C)^2}$, where P_{+} is borrowed credit of time/space from time/space condition and P is repaid debt of time/space borrowed, C is the speed at which Consciousness moves perception – speed at which Consciousness reproduces its own perception of action-reaction (expansion-compression) sequence everywhere in existence, equal the speed of light in vacuum **300.000 km/s**, but only in our part of existence and v is velocity of pressure condition in motion; **our senses deceive us since they record a part of the whole.****

Introduction

It is generally accepted that knowledge is acquired through sensed observation. But our experience teaches us that through the ages old scientific concepts have been periodically erased and replaced with new ones. We know that Ptolemy had been erased by Copernicus who had been erased by Galileo. Then came Faraday, Newton, Rutherford and Bohr and thrown all old concepts out of the window.

Our science is founded upon so called empirical knowledge, whereas “empirical” is defined as “based on experiments or experience rather than ideas or theories”. We are educated to trust our senses unreserved so that in any validation process – whenever it is possible - our senses are the supreme judge and that is why even the experimental results are, if possible, so presented that judgment of our senses could say the last word. It could be rightly stated that our knowledge is founded upon the evidence of our senses.

Generally accepted in current science is that **atom** is a basic unit of matter that consists of a dense central nucleus - containing positively charged protons and electrically neutral neutrons - surrounded by a cloud of negatively charged electrons moving around the nucleus.

To charge means to be added to. Meaning of the word “negative” is to negate, to void, to empty or become minus. So, “**negative charge**” means literally “**added to by subtraction**”! Does it make sense?! What “negative charge” means at all? How can something be “negatively charged”? There is **charge** and **discharge** ONLY!

The Coulomb Law statement that opposites attract and likes repel IS NOT TRUE TO NATURAL LAW!

Opposite conditions ARE opposing conditions. Likewise, they are opposite effects caused by each pulling in opposing directions. It is not logical to say that opposites fulfill any other office than to OPPOSE. Nor is it logical to say that opposing things attract each other.

Latest discoveries in quantum physics support the belief that atoms are made up of permanently spinning and vibrating **vortices of energy**.

The **cell** is defined as the basic structural and functional unit of all known living organisms. It is the smallest unit of life that is classified as a living thing, and is often called the building block of life.

Definition of "matter" is based upon its physical and chemical structure: *matter is made up of atoms and molecules*. This is obviously not phenomenon-logical definition but a rhetoric description.

There are many examples of differences between perception of our senses and knowing of our Mind.

We can accept the illusion of the railroad tracks meeting upon the horizon, but the railroad tracks are real for our senses, even though their seeming meeting is not.

Passengers on a fast-moving train sense parts of the landscape as they rush forward, while, to their senses, the landscape rushes backwards! The senses interpret these effects as matter in fast motion which is forever fast changing. A man, seeing the same train from a mountain, would sense that same fast motion and fast change of the landscape as changeless and still.

As we look at a fast moving car which has the wheels with spokes it appears to our senses that the wheels of a forward moving vehicle are turning backwards. Can we trust what our senses tell us!

The equator of our body is a plane extending through it between our eyes dividing our body into right-hand and left-hand units of pairs. Let's imagine that we can reach out with the right hand and grasp the right-hand end of the earth's pole of rotation. With the left hand we reach out and grasp the left end of that pole. If we stand there, as rigidly as steel, the equator of the planet and the equator of our body are in the same plane. This being true, one of our eyes is on the right side of the equator and the other is on the left side. In this position both of our eyes see only the one effect of the planet's spinning from us in the same direction. Now we bend our body so that both of our eyes can see what the right side of the planet is doing. We now see a clockwise direction to the spinning of the planet. Now we bend our body so that both of our eyes can see what the left side is doing. We now see an anti-clockwise spinning. In other words, we see opposite directions of motion where there is but one direction.

Can we trust our senses?

As a first step may I remind that Nature creates everything in pairs, and that all pairs unite to form masses? The hemispheres of a sun are united pairs, for example. Try, therefore, as a first mental exercise, to image the uniting of two hemispheres of the sun, which are spinning in opposite directions. The fact that we, ourselves, are right-handed and left-handed, adds to the difficulty of the subtle thing which I must explain about our universe, which has led these observers to form such conclusions. What I mean by this is that Nature is bilateral. Everything which is created is equally extended in pairs from a cathode dividing equator. The equator acts as though it were a mirror. It reflects each extended unit as two hemispheres of a sphere, which is also divided by an equator.

More detailed and extended explanation of these "phenomena" one can find in [9].

It is truly challenging for me to check validity of many of current scientific concepts.

I. Experiment

There are some evidenced and accepted phenomena in the science which have been attracting my special attention and challenging creativity.

The first intriguing phenomenon is the known fact in the science that living cells show a difference in electric potential between their interior and their surrounding medium [1].

The second one is the phenomenon of so called “sickle cells” [2]. It appears under a microscope that the red blood cells of the balanced body are microscopic rings with holes in the center (Fig. 1.), whereas different disturbances which sufficiently upset the balance of the body metabolism will break openings in these rings and make them appear to be sickle-formed so that the little white discs which constitute the red corpuscles of the blood appear to have frayed edges, as though they were moth-eaten.

Fig. 1. A - balanced red blood cells, B - sickle cells

The third phenomenon which has been challenging my imagination for many years is the vacuum gas discharge phenomenon (Fig. 2.), (as I've explained above, vacuum does not exist anywhere in the universe, but we can build it in a laboratory) where it can be seen clearly that the electric current in form of parallel light rings are extending from the cathode to the anode, like buttons strung upon a thread. In the beginning of the discharge it is clear to see an instable phase with light rings spinning very fast around their own centers until a stable phase is established where those rings are lined in planes that are at 90 degree from the shaft going through the centers of all rings. But, even during the stable phase is still possible to see the light rings spinning fast around their own centers.

Fig. 2. Gas discharge phenomenon

The fourth well known and so intriguing phenomenon is that there is no electric current in the center of a conducting wire but that it is confined to its surface.

It is logical to assume that there must be a red thread connecting all these phenomena, something secret and not known yet, something that is crucially different from everything what scientific explanations of these phenomena could offer. I have started a search in order to discover truth about it by studying Walter Russell: [3], [4], and [5] as well as PHOENIX JOURNALS, references [6 to 14], where it is claimed that cell, atom and particle are made of the light rings spinning around a black hole. After many years of studying the clear idea was found how to emulate a living cell and how to perform an experiment in order to prove the common scientific concept of the cell.

Having in mind the under microscope observed fact that the balanced red blood cells are microscopic rings with holes in the center, one can emulate a section of a living cell if one puts a water solution of the ordinary table salt (NaCl) within a ring of a conductive material. Water should be taken because living cells are made mostly of water and salt should be taken because salt is a balanced compound: sodium-chlorine is a balanced pair according to the [3], [4] and [5]. One can emulate the charged condition of the living body, of which the cell is a part, by placing two insulated wires with bared electrodes close together in the center of that ring and connecting the wires with a battery as an electric power source. This literally provides the permanent charging (compression) condition to occur. According to the law of action and reaction expansion will be simultaneously created and that is what has been measured in the experiment. In other words in this way the pulsing in and out (breathing in and out) is caused, what is the outstanding characteristic of every living entity.

Fig. 3. Experimental set-up

The following experiment (Fig. 3.) has been designed with the objective to prove the scientific concept of the cell by measuring the electric potential at different positions in the equatorial plane of a conductive ring. The experiment went as follows:
 In the bottom of a cylindrical glass container (see Fig. 3) a copper ring made of a copper wire of 3mm diameter has been placed so that the outer diameter of the ring is equal to the inner diameter of the glass container (the ring fitted exactly to the container) and (bi-distilled) water salt (NaCl) solution has been filled into the container so that the ring has been fully immersed into the water salt solution. Then a plastic cylinder (green part in

Fig. 3) has been fitted into the upper part of the glass container above the water salt solution. For the sake of the precise positioning of the electrodes the nine guiding holes have been drilled in the plastic cylinder: a hole in the center of the plastic cylinder (point 0 in Fig. 3), four holes pointing the half distances from the center to the cylinder edge in the four orthogonal radial directions in the equatorial plane of the ring (points 1, 2, 3 and 4 in Fig. 3) and four holes pointing the middle of the copper ring in the four orthogonal radial directions (points 5, 6, 7 and 8 in Fig. 3).

Through the central hole two very thin insulated copper wires (0.3mm in diameter) have been placed whose tips have been immersed in the solution to the level of the equatorial plane of the copper ring (see Fig. 3). By each wire the insulation has been removed at the tip in length of 2 mm so that two bar parallel electrodes were formed (see zoomed part in Fig. 3). The distance between two electrodes was approximately 0.1mm. The outer ends of the copper wires were connected with AAA battery of 1.543 V.

By placing the two electrodes in the center and turning on the electric current the same electric potential of 1.543 V between the two wires has been measured by a digital multimeter over long period of time.

By keeping one bar electrode in the center and placing another bar electrode in positions 1, 2, 3, and 4 (which belong to the equatorial plane of the copper ring) the same difference in electric potential of 0.48 V has been measured in each of these points with the electric current being turned on.

By keeping one bar electrode in the center and connecting another bar electrode with the copper ring at points 5, 6, 7 and 8 the same difference in electric potential of 0.84 V has been measured in each of these points by turned on the electric current.

II. Axiom

The UNIVERSAL BALANCE (EQUIIBRIUM - STABIITY) is infinite and eternal for it is ONE – SINGULAR QUALITY. It is the normal STATIC - EQUILIBRIUM state of Being and being the ONE it cannot be the other, so it is UNDIVISIBLE, UNCONDITIONABLE (CONDITIONLESS), UNMEASURABLE, UNCHANGABLE (CHANGELESS - STATIC), INSEPARABLE, FORMLESS and UNMOVABLE (MOTIONLESS – “STILLNESS”)! In BALANCE – ONE, there is NO OPPOSITION. BALANCE IS ONE IDEA - ALL THERE IS.

BEING INFINITE AND ETERNAL THE UNIVERSAL BALANCE CANNOT BE UPSET (IT IS THE ONLY REALITY), IT IS ONE AND ONE CAN NEVER BE THE OTHER THAN ITS OWN BALANCE, BUT IT CAN SEEM TO BE THE OTHER!

This axiom is of utmost importance and deep meditation is recommended upon this axiom since it is the base of many conclusions in further considerations.

III. Analysis of the experimental results

III.1. Zero Electric Potential

In the first case when the two electrodes were placed in the center of the copper ring the difference in electric potential between the two wires of 1.543 V has been measured continually over period of one month by a digital multimeter – the same as the electric voltage of the battery. Existence of any electric potential between the two electrodes in the center different from zero would have caused consumption of electric power what would have caused a less measured value of the electric voltage than 1.543V. If there was any electric resistance (R) between the two bar electrodes, there must had been drop in measured electric potential equal $1.543V - RI$, where I is the electric current. But, the same value of 1,543V has been measured.

The measured result proves that within the accuracy of the multimeter *the spot between the two electrodes in the center of the volume occupied by the copper ring is of the zero electric potential.*

Electric potential is defined in science as *the amount of work needed to move a unit charge from a reference point to a specific point against an electric field.* This is clearly not the phenomenological definition of the electric potential but description of the procedure how to calculate a numerical value of the electric potential. From the other side it is known that a higher electric potential is characterized by a higher pressure, a higher temperature and a higher frequency what justifies the idea to introduce **the concept of the electric potential as measure of unbalance of a pressure condition.** *Electric potential is quantification of the phenomenon called pressure condition.* Since motion causes pressure, temperature and oscillations it follows that measured value of zero electric potential in the center means *that there is no motion in the center and absence of motion is the proof that there is zero point of balance (no force and no pressure) in the center.*

*Since there is **no motion** there, there must be cold there, there must be stillness there, there must be silence there, and there must be black there. All these qualities – balance, forceless state, pressure-less state, stillness, silence, blackness and coldness - are the unique qualities of the universal space, so there must be indeed the zero point of the universal space in the very center! That centering point of stillness and balance is a black point of the universal Mind*

III.2. Electric Current outside of the Still Center

Since the electric potential is measured in all chosen equidistant points in the four orthogonal radial directions in the equatorial plane of the ring, it proves that *many lines of radiation are extending from the center and cause a moving electric current to spin around the zero center, fulcrum, around which the copper ring is located. The measured results confirm also that there is an effect of electric current – spinning light rings - extending from a still center to convey its power to the other outside conductive matter.*

The fact that an electrode placed in contact with the copper ring itself has conveyed the electric current away from it confirms that *there is an effect of electric current extending from the still center to convey its power to the copper ring.*

Further, since the electric potential is measured both at points between the center and the copper ring and at the copper ring itself it follows that the still center is the source – fulcrum - of power which is extended radially from the center to the other surrounding conductive matter and to the copper ring.

Still further, since the electric potential is measured in four directions from the still center in the equatorial plane and since the measured values are equal in same horizontal plane at the equal distances all around from the center (and having in mind that by the vacuum gas discharge phenomenon one can clearly see spinning of the light rings around their own centers) it follows logically that the moving electric current consists of light rings spinning around the zero fulcrum center – the black point, around which the copper ring is located.

III.3. The Universal Space is the Source of Energy

All this together proves that motion is born from stillness and that heat is born from cold. Since motion produces pressure what means electric potential, it follows that electric potential is born from the zero point of the universal space where electric potential is equal to zero, and it follows that the universal space, which never moves, is the fulcrum from which motion draws its power to move!

III.4. Energy is in the stillness of the Universal Space

If the power to cause motion is in the balanced state of rest, it necessarily follows that energy is in the stillness of rest, and not in motion, which is effect of cause. Therefore, it is not true to say that either heat, or cold, or compression, or expansion, or any other expression of motion is energy. It is right to call any expression of energy as EXENEGY.

Obviously, that what we perceive as motion is change in pressure condition which is expressing energy, whereas energy is the unchangeable cause which never moves. Pressure condition is released actually, not energy. Energy is sitting in the neutral state within the universal space, and energy cannot be released, as erroneously commonly believed, but energy can be expressed in form of electric potential what we call releasing, and that actually means expansion. Energy is stillness of the eternal space of the still universe at rest and it is changeless. That is what is called ether! It is believed that energy is the compressive power of motion to create dense pressure condition known as matter (since every piece of matter is a pressure condition), where gases are low pressure conditions and metals are high pressure conditions. Actually energy is expressed as pressure condition and its measure is electric potential. In other words electric potential is measure of simulation of energy which is pressure-less, motionless and changeless.

The still centering point (black point) is the source of energy which is expressed in pressure condition which we measure as electric potential.

III.5. Stillness centers motion

Generally, there is always a point of stillness which centers the birth point of any action which is expansion. Motion spins around that still point, *but there is no motion AT THAT CENTER*. We CANNOT neither multiply nor divide ZERO – the result is always ZERO!

Anyone who may question this fact may prove it by this simple experiment, and improve it – everything is possible.

IV. Science is spiritual

The essential conclusion is that there is always a black point - a still point of balance in the center of the spinning light rings.

Let me now re-consider the four phenomena which were mentioned above.

IV.1. Faster spinning of the light rings in radial direction

The measured results prove that the light rings are spinning faster and faster in radial direction causing an increase of electric potential in radial direction, what explains why there is difference in electrical potential between cells interior and their surrounding medium.

IV.2. Centeredness of the light rings

When the light rings are spinning around the geometric center of a circle (black point 1 in the center of the black circle in the middle of Fig. 4) the cells are balanced, but when the center of the spinning light rings is shifted out of the geometric center of a circle so that spinning occurs around two centers instead of one center (blue point 2 in the center of dashed blue circles in Fig. 4) it causes unbalances in cells structures called “sickle cells”. The spinning of the light rings around that eccentric center is like a fly-wheel with its shaft eccentrically placed. It has not escaped Creator-control, however, for the sun's gravity still controls it by centering a larger circle, which includes its entire wanderings around two centers instead of one (the red dashed circle in Fig. 4). That is why: “**All is well in all of Creation!**”

I call this in the science not known feature – the centeredness of wave fields - , the **QUALITY OF WAVE FIELDS**. The quality is **positive**, what means **life supportive**, when the spinning of light rings are **balanced**, or **negative**, what means **life destructive**, if the spinning of light rings are **unbalanced**. All electric radiation in this civilization has negative quality containing and fulfilling J.P. Morgan's bad intent to enslave people with expensive electric power by violation of God's Love principle of equal giving and regiving, namely **TAKING** more than giving, when he refused Tesla's good intent to transmit electric power wireless and make it cheap and available for everyone. The still Mind point in the center of every spinning light ring is shifted out of the geometric center by Morgan's bad intent. That is why every electric radiation in this civilization is causing unbalance in all living creatures, including human body, of course.

Fig. 4

Not one action of motion of human or Nature - in all the universe - can escape from the absolute centering of its action by the Controller of all actions. Anything, or any human being who tries to act escaping from it, or use his "free will power" to do as he chooses, may exercise that privilege, even unto destroying own body by so doing. S/he will not escape, however, from the perpetual control of his universal energy Source. No matter what s/he does, to upset the universal balance, s/he will find that the Creator of Creation always centers her/him, and her/his own unbalanced orbit is still on center with her/his unbalance, and is perpetually in a plane of 90 degrees from the shaft upon which it is circling.

On the basis of my invention of the centeredness of wave fields and on the basis of my awareness WHO I AM and power of human intent, I've invented the first device with new energy with awareness for balancing of any radiation: Tesla Radiation Balancer - TRB (I use Tesla's name in honor and thankfulness to his style of creative expression in seven steps which is eternal standard for creative expression in any field of human

activity). This device is a simple sticker (see Fig.5) certified by Hado Life Institute of Dr. Massaru Emoto using his method of water crystal photography - WCP.

Fig. 5. Tesla Radiation Balancer

Fig. 6. Non-irradiated water (left), water irradiated using a cell phone without protection (middle) and water irradiated using the cell phone with TRB protection (right)

For detailed explanation I will attach copy of the patent for TRB that I've written in 2008, but I did not apply for patent rights when I became aware that patent offices are made for stealing of our inventions, not for their protection, for what we people must even pay.

IV.3. Rings of light are spinning in planes of 90 degrees from a shaft of any extension of motion

There is absolute agreement between measured results and the gas discharge phenomenon (Fig. 2). Measured results confirm that what is so clearly shown in Fig. 2, namely the fact that electric current consists of light rings spinning around black points. Gas discharge phenomena confirm clearly that these light rings are spinning in planes that are at 90 degree from the shaft consisting of the centers of all rings. This fact is in disagreement with in science generally accepted belief that electric current moves along the conducting wire.

IV.4. Electric current confined on the surface

Measured results explain and confirm why electric current is confined on the surface of a conducting wire and why in the center of the wire there is no electric current. Namely, electric current is consisting of light rings spinning around black holes. Obviously electric current cannot run in a straight line – motion spins around the surface of a wire in light rings which are centered by holes where stillness sits and rules each ring. Motion is in vertical planes to the shaft consisting of still centering points of all rings. There must be always a hole in the center of the wire. A current strong enough to fill the whole wire would melt it. A still stronger current would vaporize it into gases.

Let me disclose here one more secret of electric current which Tesla knew - the greatest master of electric current ever – when he invented alternate electric current, AC. In the middle between cathode and anode there must be zero point where compression and expansion meet, exchange their polarities and continue the same game as long as there is a last bit of pressure condition on electrodes, and the measure of the rate of that interchange is frequency of AC. Even more, there is NO direct current, DC, since there must be the same polarity exchange, but due to so long wavelength of the waves we perceive it as DC.

IV.5. Science is Spiritual since Spirit is Creator and controller

Since the still centering point is source (fulcrum) of the spinning light rings we can call that point Creator or Source (because it is the cause of the spinning light rings). Let's call "Creation" that what's been creating – cause is eternal and the effect must be also eternal.

Further, since the still centering point is infinite and eternal and since balance cannot be upset it follows that stillness (balance) is the only exiting reality and that it is omnipresent. Since there are no other points except points of stillness (every point is the same point), it follows that those points MUST be also points of OMNIPOTENCE and OMNISCIENCE. All this together means that the still centering point of the measured spinning light rings is a state of OMNIPRESENCE, OMNIPOTENCE and OMNISCIENCE – in other words God-Creator!

We can call this still point Spirit, Mind and still Magnetic Light which will be always written with big "L". The simulation of Light will be always written with small "l", like by light rings.

SINCE GOD (SPIRIT) IS CENTERING EVERY PIECE OF HER/HIS CREATION (THIS MATERIAL UNIVERSE OF MOTION) IT FOLLOWS THAT SCIENCE IS SPIRITUAL!!!

The supposition of science that God could not be “proven to exist” by laboratory methods is a fat LIE! This simple experiment confirms that God IS provable by laboratory methods!

IV.6. “ATON” concept

The main misconception in science is omission of the Creator from Creation. There is nowhere Creator of the atom in the official scientific Rutherford-Bohr atom model.

From IV.5 follows that the still centering point in the center, which is the source of energy, is the Mind point. Since the black hole is found in the center of galaxies I conclude that nature has only one way of expression of energy in electric potential which is the same way both for atomic scale and for stellar scale: by projection of light rings spinning around the centering Mind point.

Having in mind all above conclusions I derive following **“ATON” Concept, in honor of its Creator, God Aton:**

A cell consists of light rings spinning around centering Mind point.

An atom consists of light ring spinning around centering Mind point.

A particle consists of light ring spinning around centering Mind point.

In the generative, compression phase of an atom, there is only centering Mind point in the center of the spinning rings. When the compressive phase reaches its maximum point the ideal sphere is created, what ONLY carbon atom reached – all other atoms are either compressive or expanding rings. At that point there is stop, the still point of no motion, the reversal point where degenerative, expansion phase begins. At that point begins drilling of a hole through the polar axes so that rings can expand and disappear back into the universal space, in its source which is two-dimensional pattern – its seed – in order to begin the same journey again and again. The compression-expansion sequence is general characteristic of any matter in creation, from smallest atom to biggest nebulae and the whole universe. The only difference is their SIZE – the secret of creation lies in the VOLUME of space.

First I had given the name of the true concept of creation “JULA” where the abbreviation “JULA” comes from: Joy United Love = Allness. The whole Creation is interplay of Joy and Love. Afterwards I have changed the name into “ATON” in honor of its Creator God ATON.

IV.7. Cold generates heat

Since the source of spinning light rings is cold and since the spinning light rings are motion (which is heat condition) and having in mind the fact that every point of the universe at rest is the same still point, we can generally conclude that cold generates heat.

The cycle of creation can be properly described like this: **cold generates, generation compresses, compression heats, heat degenerates, degeneration expands, expansion radiates, radiation cools**, and this is true law of thermodynamics.

IV.8. More proofs for God by laboratory methods

A group of scientists of the Central Scientific Company, of Chicago, has used an instrument called the Cenco-Muller Field Ion Microscope in order to magnify the tungsten atom 2,700,000 times and make it visible (Fig. 7). The Fig. 7 shows clearly that it is possible to look directly at God in the laboratory. The very center is absolutely black – there are no protons and no neutrons there. I have magnified the very black center of the picture on left and have shown it on right as a smaller black square. It is obvious that there are NO protons and neutrons in the so called nucleus of atom, and there are NO phantom “negative charged” particles called electrons. And there are no phantom nuclear forces coming out form the nucleus. Those forces and power are Spirit power sitting in the center of every atom and extending power in the measure of DESIRE oh human consciousness for creative expression.

Fig. 5. Photomicrograph of pure tungsten crystal magnified 2.700.000 times. On the small picture right is very center if big picture magnified – there are NO protons and neutrons to see and count!

The French physicist Alain Aspect and his research team discovered in 1982 that subatomic particles such as electrons are able to instantaneously communicate with each other regardless of the distance separating them [15]. It is one more proof of God in the laboratory, since every Mind point is the same point which God IS.

V. Motion is an illusion

V.1. Motion merely simulates rest

Since stillness is the only reality that exists, it follows that motion and the measured spinning light rings MUST be an ILLUSION.

Since atoms are made of spinning light rings it follows that atoms are an illusion, too.

Since matter is made of atoms it follows that matter is an illusion, too

V.2. ONE cannot be divided into parts

What is the cause of illusion? Obviously division of the WHOLE into PARTS causes the illusion! Because One IS ONE AND CANNOT BE OTHER, cannot be PART! Part must be an illusion – simulation of ONE!

V.3. Cause and Effect

We can call also the still centering point CAUSE since it causes appearance of the spinning light rings which we can call EFFECT. Obviously STILLNESS is CAUSE and MOTION is EFFECT. STILLNESS (cause) is changeless and the only existing reality and effect (MOTION) is an illusion. It therefore follows that motion is a seeming two-way expansion-compression from and to a still point of rest and has no existence save to senses (senses are motion, too) which do NOT sense expansion (action) but sense the simultaneous compression (reaction), which is voiding expansion (action) at every point of their expansion-compression sequence interchange. Obviously action and reaction must be simultaneous (ONLY STILLNESS EXISTS!) and their simultaneity may be likened to a light projected into a mirror which is simultaneously reflected from the mirror. ("mirror image reflection" gives opposite perception.)

V.4. Thinking creates illusion of motion

Still further, since motion is an illusion, it could have been created only through mental activity of thinking (imagining). Thinking is imagined action-reaction of motion mirrored from a point of stillness to a point of stillness.

Since *the balanced rhythm must not be upset* that which has been must be repeated in reverse, to void that which has been, for neither action nor reaction can end or begin. They can only be repeated through each other in order to void each other.

VI. WE HUMAN BEINGS ARE Consciousness

VI.1. WHY thinking and WHO thinks?!

Since God-Creator (Source) is ALL THERE IS s/he can only express Him/Her Self creatively through mental activity known as imagination (thinking). It follows that God is the mental Being who is creating the illusion of motion mentally by thinking (imagining), so that we can call God also MIND – because of the thinking ability which is usually associated with Mind. So, Mind is ONE (ALL THERE IS) - undividable, unchangeable, invisible MIND of God.

Having in Mind holographic principle, human being as parts of ONE, are equal to ONE.

The Mind centers every particle of matter in the material universe of motion.

VI.2. Our Mind versus God's Mind

Since God's Mind is ONE (ALL THERE IS) and cannot be other, it follows that our Mind and God's Mind are ONE (there is nothing out of ONE, there is no other Mind except God's Mind)!

VI.3. I am, therefore I think

The Mind thinks what it knows. Thinking is expression of knowing.

Knowledge (knowing) is the Mind-Idea unexpressed. Knowledge is a property of the Mind. Since knowledge is conceptual, it is unlimited.

The Mind KNOWS its one Idea of Creation as a (ONE) WHOLE IDEA OF BALANCE. The Mind "thinks" its One Whole idea into seeming parts.

VI.4. Mind-awareness of Idea

Who performed the measurement? Who am I?

Before we start the expression of an idea we must first become aware of the idea and then we must become aware of our experience that we are living through the manifestation of the idea.

Consciousness is Mind-awareness of the Idea and our experiences.

It follows that WE ARE CONSCIOUSNESS. CONSCIOUSNESS IS GOD, BUT IN PHYSICAL REALIZATION. Human Being is expression of God's idea of human in action.

Since the human Mind is ONE with God's Mind it follows that human consciousness and God's consciousness must be ONE, too.

VI.5. Desire of the Mind for creative expression

Even if we are aware of an idea we can start expression of that idea only if there is a DESIRE of our Mind for creative expression. So, *desire in the Mind is the motivating force which results in action.*

Every reaction must be in reverse of its action since the universal equilibrium is seemingly divided by simultaneous action-reaction caused by Mind-desire.

The law of action-reaction: *equal and opposite actions and reactions are simultaneously creating (because of illusion of motion) and sequentially repeating (eternal cause MUST be producing eternal effect).*

Voidance principle: *every action is voided as it appears, is repeating in reverse as it is voiding and is recording as it is repeating.*

VI.6. Holographic Principle

Since ONE Idea of Creation is infinite and eternal, it follows that every part idea of that ONE Idea is also infinite and eternal. (Infinity and eternity divided by any number equals infinity and eternity – no matter how big is the number). This is the base of the holographic principle.

VI.7. Consciousness moves Perception

Since Creation is an illusion, it is the PERCEPTION in which we (Consciousness) view or experience something that creates OUR individual “reality”. We are an INSEPARABLE part of a WHOLE, we are ONE with our SOURCE, which God IS.

As the mover of perception human consciousness IS the eternal integrator of existence and controller of existence (EXISTENCE being the interplay between CAUSE and EFFECT).

VI.8. The amazing supreme proof

There is no better irrefutable proof for the claims that we are consciousness, that consciousness moves perception, that Man’s Mind and God’s Mind are One, that desire of Mind is the main motivating force in this universe, that motion and matter are an illusion as well as that the cell consists of the light rings spinning around the centering Mind point than the amazing teachings by example of a Dutch named Arnold Gerrit Henskes whose pseudonym was Mirin Dajo [16]. He claimed that his body was invulnerable and he proved it many times by piercing his body with a sword without injury, even through his heart (see Fig. 8 as well as this link: <http://mirin-dajo.com/mirindajo.html>).

Fig. 8. Amazing teachings by example

Dajo's teachings were that people should abandon the materialistic world view and accept that there is a higher force - the Source, that God was using him to show us through his invulnerability that there is something better out there and that materialism only results in misery and war.

What is the difference between the Dajo's Mind and the Mind of a layman?

Both Dajo's Mind and a layman's Mind are One with God's Mind and are omnipotent and therefore can do anything what they accept as truth. The Layman's Mind accepts as truth that his/her body is real and that a sword would injure his/her body or even kill him/her (because he/she heard it or saw it) and his/her Mind provides for it to happen if his/her body is pierced with a sword. Dajo's Mind knows that both his body and a sword are an illusion, he is aware that the power of desire of his Mind (which sits both in the center of every of his cells and in the center of every atom of a sword) decides about the outcome of interaction of his body with a sword so that he has decided that nothing happened! In other words, Dajo allowed his Mind to function properly in actual thought projection so that a sword striking his body had been hardly noticed, whereas the Mind of a layman is convinced of the ability of a sword to injure and kill and the body reacts as directed - if struck appropriately, it dies.

Dajo had been aware of the power of the desire of his Mind. He had been aware of himself as the still observer of his experiences. He had been aware that he as consciousness had been moving the perception of his experiences with a sword and that is why he had been able to control it absolutely.

VII. Expression of energy - EXENEGY

VII.1. Fundamental equation

The basic concept of energy in science is that energy is within matter or that energy is a condition of mater, such as heat. There is the famous Einstein's equation of equivalence of energy E and mass M: $E = M * C^2$, where C is the speed of light in vacuum, 300.000 km/s. There are also beliefs in science that energy moves and that energy can be released.

But, what we call "mass" is consisting of light rings simulating energy by spinning around the centering Mind point. Energy is NOT converted into mass, but energy is expressed in a pressure condition which we quantify and measure as electric potential!

I call EXENERGY everything what is motion as expressed energy

We can say that balance is expressed in unbalance and define electric potential as the measure of unbalance.

All actions in Nature are extension-retractions from zero to zero, and back again to zero. All are balanced simultaneously and sequentially. This is a zero universe of plus and minus zero which never exceeds the zero of the One Light from which it seemingly sprang as multiplicity.

This zero universe of equilibrium demands two opposed conditions in order to simulate that which our senses interpret for motion and change. These two needed conditions are plus and minus equilibrium - positive and negative electricity.

Fig. 9. *X plus zero equals zero minus X (X – borrowed pressure)*

The basic equation is:

$$X + 0 = 0 - X \dots\dots\dots VI.1,$$

where 0 (zero) is not number but **potential for anything**. In this equation X is **exenergy**, what is any pressure condition, never mind how we call it or quantify it. The zero 0 is energy – potential for anything.

As example, a thousand dollars borrowed from a friend is a plus condition of credit which is balanced by an equal debit of one thousand dollars. The central zero represents the friend. The extended zeros represent credit and debit. Both are equal but opposite. A credit of one thousand dollars equals zero. When the credit is paid in part or in full the debit is proportionately voided simultaneously with the credit.

These two opposite conditions of credit and debit correspond with the two opposite conditions of compression and expansion in Nature upon which Motion is dependent. When an equilibrium pressure is divided into opposite conditions from the zero from which both are extended, motion between the two becomes imperative. They must interchange with each other to void their unbalanced conditions. This is the principle of the electric current.

In Nature the discharged radiation which explodes outward from the sun simultaneously explodes inward as gravitation. That is the “secret” of the charging power of the sun.

In science pressure X is quantified by definition that it is force F over the unit surface S :

$X = F/S = F \cdot l / (S \cdot l) = A/V = E/V$, where X is pressure, l is distance or path, A is work which is equal to energy E and V is volume. From this equation it is clear that pressure condition is measure of the ratio of energy and volume. But, pressure as defined in science is mainly static condition

Or, in physics of gaseous states: $X = n \cdot R \cdot T / V$, where n depends on the particular gas, R is constant and T is temperature.

This is so logical: the more intense is our desire, the more we compress the borrowing into the smaller volume, what means higher pressure, and higher pressure means higher electric potential. But, pressure as defined in science is more or less static condition (like atmospheric pressure) not taking into account necessary interchange as permanent dynamic process for which the proper measure is electric potential P .

Let me consider existence existing as an open-ended electro-plasma, always evolving through its interacting matter (M) and energy (E) fields or modes. Those two fields of existence also eternally interchange in a relationship expressed by Albert Einstein as $M=E/C^2$ (from $E=M \cdot C^2$) in 1905, with C being the universal constant representing the speed of light.

Existence **MUST EXIST** - it cannot **NOT** exist. Moreover, no vacuum void of existence is possible. "Vacuums" of the matter field can exist as in outer space, in vacuum-pumped containers. But, all those volumes are **FILLED** with the generally **unmovable**, frictionless **ENERGY** ether or field - a **uniform**, continuous field of energy.

Einstein's concept of mass was wrong. Every mass consists of light rings spinning around centering zero Mind point and it is unbalanced condition and the proper measure of the unbalance is electric potential.

Each component part of an equation needs a label. Now, as with $E=M \cdot C^2$ or whatever - **WHAT IS "C"?** It represents the universal constant which represents the speed of light - to Einstein. It **SHOULD REPRESENT "consciousness" - THE SPEED OF CONSCIOUSNESS - NOT LIGHT, IF I AM TO BE ACCURATE!**

VII.2 Process of creation

This entire universe of motion is entirely electrical. Every effect of any nature, whatsoever, is basically electric. Whatever happens in any way stems from the electric current. To know just one wave unit of the electric current is to know all there is of the construction of matter, or the cause of any effect of motion, whatsoever.

The secret of Creation lies in the octave wave, therefore, know the wave. Also, it is very good if we all first become electricians for all other "careers" are secondary to that of understanding electricity. The same thing is advisable to the humanist, poet or

missionary. First be an electrician! Know the electric current if you wish to control people, matter, or YOUR DESTINY. Now, Nikola Tesla knew this simple fact very well indeed, and used the knowledge in practical applications.

The chemist and musician make use of the same octave tonal scale, and the clergyman who knows its rhythms is vastly more fitted to balance human problems. I say to all men in all professions, and all walks of life, from the statesman to him who wields a shovel: If we would know our universe of motion, our relations to it and our control over it, **FIRST THOROUGHLY KNOW JUST ONE CYCLE OF AN ELECTRIC CURRENT AND THE STILL FULCRUM FROM WHICH IT HAS ITS BEING.**

Let me **imagine** one wave cycle of electric current in order to clarify what is meant by **”THOROUGHLY KNOW JUST ONE CYCLE OF AN ELECTRIC CURRENT AND THE STILL FULCRUM FROM WHICH IT HAS ITS BEING”**, which Tesla mastered to perfection so that he could beam electricity around the globe wirelessly!

I imagine now within the darkness of the universal space (Fig. 10) in the vertical plane in regard to my eyes a set of four circular concentric rings of invisible White Light, one within the other, with a common center of invisible White Light which I locate in my Mind to concentrate my thoughts and my thought-power in order to express my Mind desire to create a one cycle of electric current.

Fig. 10

Fig. 11

Now I divide my extended thoughts of this one set of four invisible White Light rings into two sets of four rings of visible light (Fig. 11) and in my thoughts I extend each of the two new born sets of four visible rings, in the same plane symmetrically to the common invisible center of the initial set of invisible rings, along the straight invisible segments of equal length on both sides –up and down – the smallest bright ring in each set occupying a dark circle in the middle with the very, very small common centering point of invisible still White Light at its very center so that I can clearly “see” with my inner vision the small common centering point of invisible still White Light in the middle of the dark circle that is surrounded by the first – the smallest bright ring of visible light,

that is from outside surrounded by a dark circular ring of invisible Light, that is from outside surrounded by the second bright ring of visible light, that is from outside surrounded by a circular dark ring of invisible Light, that is from outside surrounded by the third bright ring of visible light, that is from outside surrounded by a dark circular ring of invisible Light, and that is from outside surrounded by the fourth ring of visible light. I extend in my thoughts each of the new sets so far from each other and tilt them that I can clearly see them in perspective – gaining the illusion of the depth of the picture. In my thoughts I identify as a SHAFT, the connecting invisible segment between two centering points of still invisible Magnetic Light of each set of rings, consisting of many such points of invisible White Light. In other words, instead of one common center I “created” (since every point of the space is the same point) two such centers by “extending” the one invisible center into two invisible centers. By so doing I created a big black cold hole in the bitterly cold darkness of the universal space. In order to create a body of solid matter in this cold hole I must heat the hole to incandescence, and then freeze the incandescence by surrounding it with the universal basic cold, to imprison it until it has fulfilled its purpose. Now I use the basic cold to compress (due to the huge space surrounding my creation) series of four pairs of rings into spheres by squeezing the cold black hole out and letting the four pairs of compressed rings-spheres of light in.

So, I imagine now how immediately after the extension is completed all rings of each set together start simultaneously spinning – upper set of rings from left to right, clockwise, and lower set of rings from right to left, anti-clockwise, around the common centering points of still invisible Light so that all rings start moving toward their mates from the opposite set with ever increasing speed of spinning and with ever decreasing radius, each set of rings keeping its spinning in the plane normal to the still shaft connecting their still centering points and how simultaneously with beginning of spinning all rings of the upper set became red spectrally colored and all rings from the lower set became blue spectrally colored . I imagine further all rings of each set spinning together with ever increasing speed of spinning and how the sets of rings are approaching each other with increasing speed and how colors of each set of rings are changing with their approaching to the mutual point of collision. I imagine how with progression of their nearing to their equal mates in the opposite set, the shaft itself, consisting of the identifiable still centering points around which the sets of rings are spinning, follow the half-wave-forming paths on both sides. I imagine now how on both sides, at three focal points, three visible rings are formed, each spinning around still points of the still invisible light at

Fig. 12

Fig. 13

Fig. 14

Fig. 15

shaft, in its normal planes to the shaft; the first and the biggest ring at the half distance from the starting position to the point of collision, the second much smaller ring at the half distance from the position of the first ring to the point of collision and the third much, much smaller ring at the half distance from the position of the second ring to the point of collision. As the two-way spirals of forming matter extend from the wave field center in opposite directions toward wave field intersections, three points of still light on both sides are focused upon the still shaft of each half cycle. Centers are formed at these focal points which become the one, two, three positive and negative elements of matter by rotating gyroscopically upon the wheels of light which act as equators for those forming tones. I imagine now how the two fastest, the frontal sets of rings collide with each other at the amplitude of their half-wave-forming paths and how at that very moment the a disc-

forming 3D shapes are created with the center at the amplitude of the wave-forming path (Fig. 12), whose upper and lower part are rotating with ever increasing speed, each thus becoming upper and lower hemisphere of so gradually prolating ideal hot incandescent sphere – rotating around its polar shaft – thus formed at the amplitude of so identifiable wave-forming path of the still centering points of all rings (Fig. 13). I imagine now how the sphere is gradually prolating until an ideal incandescent sphere is formed at the wave amplitude position (Fig. 14 and Fig. 15). This constitutes the entire generative, or polarizing principle of my creation of the one cycle of electric current, for the only things created are heat and motion.

The heat and the motion that's been given to the sphere must be regiven back to the cold and to the stillness from which I extended them using the power of my thoughts. The degenerative way of doing this is just the reverse of the generative method (Fig. 16, Fig. 17, Fig. 18 and Fig. 19). So, I gradually let the cold, black hole return within the hot sphere by projecting rings, in series of four, from the equator of the sphere until they entirely disappear into their basic, changeless cold. My cycle of electric current thus begins to appear as rings of visible light around black holes, and finally disappears as rings of visible light around black holes.

I imagine now how at the very moment of maximum heat and maximum motion the still centering points of all rings fusion altogether in one centering point of the ideal incandescent hot sphere, and how with that fusion all spectrum colors from both sides disappear into the White colorless still Magnetic Light, and how at that very moment the sphere stops rotating for a moment. I imagine now how all processes from now on go in reverse: the incandescent sphere starts rotating in the opposite direction starting from zero speed of rotation and increasing its speed of rotation gradually. I imagine further how the oblatting sphere with ever increasing speed of rotation is flattening at poles thus gradually being reformed into four equatorial ever expanding rings with ever increasing speed of

Fig. 16

Fig. 17

Fig. 18

Fig. 19

rotation, until they completely disappear back into the stillness of the universal vacuum from which they sprang, with their centering points following the same wave-forming paths in reverse: from the amplitude point to the zero point at wave shaft (Fig. 20).

Fig. 20

So, I gradually let the cold, black hole return within the hot sphere by projecting rings, in series of four, from the equator of the sphere until they entirely disappear into their basic, changeless cold. My cycle of electric current thus begins to appear as rings of visible light around black holes, and finally disappears as rings of visible light around black holes.

The one cycle of electric current is so completed: from the zero point in the universal mind to the zero point in the universal mind and back to the zero point in the universal mind.

That is my MIND-ENERGY expressed by my thinking. My thoughts divide these four rings of White Light into four pairs of visible rings and thought-waves and project them toward each other for the purpose of uniting the FOUR PAIRS INTO ONE. These four pairs collide and become two hemispheres of compressed light spectrum centered by White invisible Light. Together they make one perfect sphere. That is the way that all matter is creating (“creating” since creation is permanent process – Creator is eternal being).

These four invisible White Light rings represent the beginning of my spectrum thinking. They are the basis of the octaves. They are my imaginings. In them is the pattern of my imagined IDEA. They are IDEA IN CONCEPT – UNCREATED IDEA in concept.

I am not telling this as a principle of physics for it is not even known in physics. I am telling it as a universal principle whether in morals, character-forming or invention, or whether in the painting of a picture or trading furs for food. Every transaction in Nature or in the social, marital or business life of people must follow this octave principle of DIVISION of an idea into its two parts and then uniting of those parts by four progressive steps toward the mature idea. THE RESULT OF THAT UNITING is what counts for success or failure, happiness or misery, peace or war. If the divided pairs are equal mates the result is balanced.

I remember that there is perfect symmetry in the divisions of the pairs which interchange with each other to consummate oneness in themselves – such as sodium chloride – and then unite with each other as a whole to consummate unity of the whole idea.

If I will now think of the universe as one undivided Idea and of all the parts of the universe as many IDEAS which are divisions of the whole ONE IDEA, I can better comprehend that the divided ideas are expressed in octaves because the wave which divides them is expressed in spectrum-divided octaves. Octaves grow. They become waves. Waves come and they go. In “electric” terms, they are called frequencies or cycles. In terms of growth, these cycles are called life and death cycles. They come and go. Everything in nature comes and goes in order that it may come again.

That is the way IDEA is given bodies to simulate IDEA OF MIND which has no body.

Creation might well be likened to the tapestry weaver who KNOWS the one idea as a whole, then THINKS IT INTO PARTS, then RECORDS those parts by interweaving their spectrum colors into the many forms which, together, manifest the idea as a whole.

In support to this scenario let me place the NASA's recording (Fig. 21) somewhere in the universe where light rigs are so clearly visible as well as the whole process of creation.

Fig. 21. The process of creation is recorded by NASA in the universe in prospective

One more important remark: **everything moves within ME, since I Am Consciousness – God in physical realization.** This is doorway into Omni physics, but about it in next article.

Einstein's equation was pretending to describe radiation, according to the official scientific concept of Bing Bang and ever expanding universe, where there is NO compression. But, it turns out that that equation describes non-existing compression (see Fig. 24) according to the science. Since all three concepts, (of mass, of energy and of seed of light) were wrong and since it describes only one part of creation cycle, that equation is not valid. The half-truth cannot be truth, even if we neglect the fact that the equation describes the part of creation cycle – compression – that was unknown to Einstein.

The light (small “l”) does not travel at all as supposed in science, but **consciousness reproduces in reverse its own perception of action-reaction (expansion-compression) sequence in the adjacent wave fields!** More about it one can find in Ref's [3,4,5], but I will place here two drawings from Walter Russell (Fig. 22 and Fig 23) with short explanation.

Fig. 22. Thank you my brother Walter, we are ONE

One can see clearly one action-reaction cycle on the right of the drawing – the red curved line going from the red point at the upper front corner of the cube and further from the center of the cube to the lower front corner of the cube (the other red point). Then that complete cycle is gyroscopically moved to the left adjacent cube (which is cut in the middle of the drawing) so that the upper front corner of the right cube became the upper back corner of the left cube and the lower front corner of the right cube became the lower back corner of the left cube. That is how “light moves”.

The same can be better seen in next Walter’s drawing, whose last incarnation is the most important incarnation in the history of mankind on this planet since he brought the KNOWLEDGE.

Untitled. Published as Figure 76 in *The Secret of Light*.

Fig. 23. Gyroscopic planes and cubic wave fields

Who needs detailed explanation of the gyroscopic principle can read about it by Walter. It requires much space and goes out of the scope of this dissertation.

Since $W = M \cdot G$, where W is weight and G is gravity, it follows:

$$E = (W / G) \cdot C^2 \dots\dots\dots (VII.2)$$

Let me now consider **WEIGHT**.

Weight is a measure of unbalance. It indicates **the intensity of desire of any mass which is out of balance to find balance.**

Every mass in the universe has its proper electric potential position. Every mass will find that position if not prevented from doing so by the bindings of other masses.

Weight should be measured dually as temperature is. It should have **an above and a below zero to measure the intensity of desire in masses to rise from the earth as well as to fall toward it.**

WEIGHT IS MATTER OUT OF PLACE All matter is a record of its electric potential at the place of its birth in its wave. Masses of matter, like buoys floating in the ocean to

mark courses for ships, are floating in space to register the electric potential of the position of their birth.

Whenever matter is in the place of its birth, it belongs there. It is, therefore, in balance. It floats in its balanced field. In that position it is weightless in respect to anything else in the universe. Whenever it is taken from its field center, or becomes an eccentric part of another field, it is out of balance with the two forces acting upon it. *It then has weight, and the measure of that weight is the measure of its unbalance with its out-of place environment.*

Weight of matter and measure of electric potential are one and the same thing!

WEIGHT IS UNBALANCE! A body which floats has no measurable weight. It is in balance with its environment. Likewise, a dead battery has no measurable electric potential. The am-meter needle points to zero. Its two unbalanced conditions of charge and discharge have become voided by each other.

The measure called "weight" and the measure called "electric potential" are the expression of force which the two electric opposites of charge and discharge exert against each other at any point in the universe.

The plane of our earth's equatorial region coincides with an equipotential plane of pressure which is equally balanced in respect to that part of the earth which floats above that plane, and that part which floats below it. In this plane the earth has no weight whatsoever in respect to anything in the entire universe, for it is in a balanced position in respect to the entire universe and keeps moving into a new position only because of the movement of all other masses in the universe.

BALANCED EARTH IS WEIGHTLESS. The earth could have weight only if removed to other pressures farther extended from the plane of the lens-like wheel of which our sun is the hub. If it could be pushed toward the sun by some giant hand, it would seek balance in its own orbit when released, exactly as a man would rise when plunged beneath his own balance level in water. Every freely moving mass in the universe floats in its own equally divided wave field exactly as a man floats in water.

The moon is not falling upon the earth, as generally supposed, for it is in balance with its environment and cannot fall. Its contracted mass is equal to the expanded mass it displaces in its wave field.

For the same reason a cloud floats in the sky. If one could put scales under it, one would find it had no weight unless lifted above or thrust below its equipotential level. If it condensed into heavier vapor, it would fall to seek a new static equator where it would again float. If it condensed to rain, it would fall into the sea to find balance in a like condition.

Weight is not a fixed property of matter. It is as variable as matter is variable.

Human's body weighs less as he climbs a mountain, weighs more as he descends into a mine, and weighs nothing when he floats in water. Unless, and until, matter is extended from a plane of equal pressure, there can be no weight, nor can there be electric potential.

WEIGHT CURVES GRAVITY. The equilibrium of sea level is a good example. If that static equator has no dynamic wave extensions, there can be no electric pressures exerted to express in weight, nor could there be weight of waves when waves are not extended from it. Waves above sea level have a positive weight, when they fall toward gravity. Waves below sea level have negative weight, when they rise toward space to find balance at sea level.

Weight is, therefore, but a dimension of unbalance. *Unbalance alone can be weighed, for there can be no weight to balance.*

LET'S DEFINE "WEIGHT":

According to Natural Law, the following definitions of weight are in keeping.

1. Weight is the sum of the differences between the two pressures which act upon every mass.
2. Weight is the measure of the differences in electric potential between any mass and the volume it occupies.
3. Weight is the measure of unbalance between any mass and its displaced environment.
4. Weight is the measure of the force which a body exerts in seeking its true potential.
5. Weight is the sum of the difference between the inward pull of gravitation and the outward thrust of radiation.
6. Weight is the measure of intensity of the desire within all matter to express motion or seek rest from motion.

Electricity is the servant of Mind. It does all of the work of Creating this light-wave universe in unfolding-refolding sequences which Mind desires. ***The universal Mind has two desires - the desire for creative expression through the action of concentrative thinking and the desire for rest from action through decentrative thinking.***

One desire is for separation from Oneness into unbalanced multiplicity and the other is a avoidance of multiplicity into balanced Oneness. *One desire is for action and the other for rest.*

These two desires of Mind constitute the give for re-giving principle by means of which all things in nature grow or unfold by appearing from the void of rest in the kingdom of

heaven from which all creating things appear, reappear and disappear in sequential cycles.

The electric expression of the two desires is reflected in the pulse beat of the universe. One pulsation compresses, the other expands. The compressive pulsation gives form to idea by seeking rest at wave amplitudes through centripetal action. The destructive pulsation voids form to seek rest at wave axes through centrifugal reaction. These two opposite desires are characteristic of all effects of motion. All animal, vegetable and mineral life seeks action and rest alternately. All effects of motion manifest that principle. A ball thrown in the air seeks rest from its action and returns from its unbalanced condition to seek out rest through reaction.

A ball thrown in the air must start from a point of rest, motivated by desire of the thrower who borrows energy from the "center of gravity" of the earth which is its fulcrum. The point of rest in the throwers hand is an extension of the earth's still center. As the ball ascends, it decelerates as it pays its borrowed energy to space, thus charging space with the borrowings of earth and equally discharging earth. When the borrowing is fully paid the ball comes to rest at the highest point. From that point it must again borrow the energy from space which it borrowed from earth to pay for its return to earth. Upon its accelerative journey to earth it passes each point at the same speed it registered on the upward half cycle, thus discharging space and equally charging earth to balance all borrowings and payings.

All actions in Nature are extension-retractions from zero to zero, and back again to zero. All are balanced simultaneously and sequentially. This is a zero universe of plus and minus zero which never exceeds the zero of the One Light from which it seemingly sprang as multiplicity.

Let me now expand the concept.

*Who is the thrower of the ball in air? It is Me, Consciousness – All There Is! With what I've thrown the ball in air? With My DESIRE to do it using My body as toll. When my desire is weak the ball reaches low height, but when my desire is strong the ball reaches much bigger height. Where the ball moved? It moved within Me – Consciousness since I AM ALL THERE IS. What moved within me, actually? Did ball moved or something else? It was my perception which I moved within Me. Is my perception real? Of course my perception is NOT real – I AM the only reality. It moved only for senses of My body which perceive generation process which compresses time/space as one variable, but not the degeneration process which expands time/space as every point of the process voiding it at every single point of its journey from point of res to point of rest. Then, what I've moved within Me at all? I have moved perception within me that I've imagined as ball. It was **time/space** as one variable that I've moved within Me by perception. I define time as **duration between events of generation and degeneration**, but it is inseparable variable from space which I define as **imagined screen within me at which I've projected My perception of motion. Time/space is one variable which is creating GRAVITY – the***

sucking effect, as the measure of my desire, either it sucks to smaller or to bigger volume, or to realization of any potential, any life circumstances.

I express here my special thankfulness to my great teacher Master St. Germain.

I will use letter P to denote time/space as one variable to remind on perception.

Now, what is relation between P and W/G? Obviously $W/G = P_{+-} / (1 - (v/C)^2)$, having in mind Einstein's equation which properly describes generation (compression) phase of creation (honoring him, although he thought that his equation describes radiation – expansion; my honor to him is honor for his improved perception of time, but still not the right one), and I will just add to it degeneration (expansion) phase of creation in order to describe the full expansion-compression cycle of creation:

$$\mathbf{E = P_{+-} * C^2 / \sqrt{1 - (v/C)^2}..... (VII.4)}$$

where P_{+} is borrowed credit of time/space and P_{-} is repaid debt of time/space, both measured (quantified) as electric potential.

More detailed derivation and explanation about the basis of the Omni physics will be given in my next dissertation. Let me for now integrate and honor past perception of my beloved aspect Einstein, Fig. 24.

Fig. 24 Laki vs Einstein

Logically C must be velocity at which energy is expressed in time/space. Or, C is speed at which consciousness moves perception – “speed of perception”.

C – is the speed at which consciousness moves perception - the speed at which consciousness reproduces its own perception of action-reaction (expansion-compression) sequence in the adjacent wave field in reverse, in our “reality” ONLY – it is frequency of repetition (reproduction) of illusion ONLY in our “reality”.

We know now that Light does not travel at all, but that Light is simulated in light which reproduces itself in surrounding bodies. There is only ONE Light that seemingly is two. We can imagine a mirror-walled room with a light in the center. The mirrors would reflect into each other, and the thus reflected light would APPEAR to extend into infinity. But it would be the same light! Just as a man can have two hands, belonging to the same body, God can have two or more EXTENSIONS OF HIMSELF, and yet it is still just the One. We only THINK of ourselves as separate entities, in reality we are One in God.

The still One Light of equilibrium is simulated by both its seemingly division into light expansion-compression (action-reaction) sequences and reproduction of those sequences is at the rate of 300.000 km/s anywhere in our part of existence.

Finally, C is the speed at which consciousness reproduces its own perception of action-reaction (expansion-compression) sequence everywhere in existence – it is frequency of repetition (reproduction) of illusion everywhere in existence. This justifies calling it “speed of perception”.

VII.2. What about our senses?

Our senses are inadequate since they record but little of the whole. If the senses could but see the whole there would be no interplay between cause and effect.

Since our senses are themselves motion they can only respond to motion. Since motion is an illusion, it is obvious that our senses deceive us.

Our senses sense the forward movement of a moving objects piling up compression ahead of it - but they do not record the mirrored invisible counterpart of that moving object (equal to it in potential and speed) moving backward into a space behind that moving object which simultaneously voids the compression ahead of it.

Senses cannot know since they sense illusion – Mind knows the truth.

VIII. Comparison with other teachings

In order to make comparison of my conclusions with other teachings below are given a few fragments which are taken from the references [3] – [14]. The chosen fragments show not only the absolute agreement with my conclusions but they also confirm that my conclusions are a good base for some other true concepts, like the concept of gravity.

VIII.1. Particle, atom, cell

“The nucleus of every atom is Mind-energy. The electrical power of motion, which spins spirally in one direction throughout all the universe, records Mind-knowing in Mind-centered rings. Electric rings are atoms and united pairs of rings are atomic systems and cells. Compressing atoms multiply to express life to its maturity in cells and systems. Cells and systems then divide again into expanding atom rings to rest in their eternal cathode Self, which man mistakes for death.

In an electric current there is a constant interchange between anode and cathode or positive and negative poles. A light particle expands, as it leaves the cathode in an outward radial direction and contracts as it radially approaches the anode. This light particle has been the same light particle at all times in all parts of its journey. Its variation of charge and discharge, its direction of motion and the condition of wave pressure in which it finds itself at all times are the sole reasons for its changing from one condition to

another. The light particles are all the same light particles, all being different only in pressure condition. This is also true of the elements of matter. Whether they be iron, carbon, silicon, bismuth or radium, all are composed of the same kind of light particles.

They all seem to have different qualities and attributes, but those qualities and attributes are likewise given to them purely by the positions they occupy in their waves.”

VIII.2. Gravity

“We have now arrived at a point where the relationship of gravity and magnetism can be more easily comprehended. They both belong to the zero universe. They are both one, but each has a different connotation in common usage which requires two words to define their separate meanings, just as an armchair and a rocking chair are both of them chairs, but require two words to differentiate them. Gravity really means a point, or shaft, that can be located in the invisible universe, where Mind desires to concentrate thought, and thought-power. You cannot see gravity but you can locate it at the very center of every creating thought-ring, which constitutes what we call bodies of matter. You cannot SEE Mind either, but you can locate Mind also, for Mind is also that center which balances, controls, surveys and motivates its electric thought-rings in their effort to simulate the Idea existent within that stillness, by fast or slow motion.

There is not *more* gravity or *less* gravity anywhere. The seeming increase of the power of gravity is *electric potential*, which means faster motion in smaller circle. Gravity shaft and centers of gravity are the omnipotent zero of the Mind Universe. It is the same everywhere. It is *all-powerful* everywhere. The nearer that motion can come to it the greater the power which can be drawn from it. In Man that power is desire. Desire for closeness to God gives one that power in the measure of Man's desire. The measure of power which Man takes from it is the measure which is dependent upon his own desire for omnipotence, and his willingness to multiply his thought-power and action into electric potential BY ACTION. In so doing he decentrates to the Source of where gravity multiplication begins in order to conceive Idea and gain knowledge. He then concentrates to manifest God's omnipotence in him.

Let us look at this for that which it really is; Gravity and the Magnetic Light are ONE, but the connotation of gravity differentiates it from the word God. They are the same, however, for God is the universal Soul while Soul in Man means Identity, or Being, as a unit of the Universal Being. The moment that electricity divides the One changeless condition into pairs it is necessary to balance and control those pairs. Gravity is the Magnetic control and balancer, although its power never multiplies or divides. Where gravity is, stillness is. An area of stillness always surrounds gravity shafts. These areas are the holes which center the rings of electric potential which continually multiply compression, or divide it by expanding, in accord with the desires of Nature, or Man, to manifest that all-power which is within, and omnipresent in all things. The "meaning" of "gravity" is a most often asked question for it is not well understood and is NOT that which the science books explain it to be.

The one most important thing to burn into your consciousness is to realize that wherever motion is, it is centered by stillness, and that stillness is its CAUSE. The universe is composed of electric thought-rings of motion. Each thought-ring is centered and controlled by the Creator of that thought-ring. God creates His universe in that way. You create your universe that way, also. It is God who sits there. It is the Magnetic Light of all-knowing, all-powerful Mind which sits there. We call that centering point GRAVITY. The reason why we call it gravity is because there are adjacent thought-rings which have united together so closely that we think of them as **mass**, instead of rings. Each added ring of the mass has its Mind-center in its own plane. In a mass, therefore, there are seemingly so many Mind-centers of stillness that they constitute a shaft. The word "gravity" arises from this fact. Gravity is a shaft of Mind-controlling stillness. In that sense, gravity and God are one. Now you-have the whole story except for one thought to complete it. Every point of that gravity point is the same point, for God's zero universe is omnipresent."

VIII.3. The Purpose of Perception

"Creation never began and will never end. Such a concept as the birth of the universe theory now accepted as fundamental belongs to archaic ages, not to this age. Creation is eternal. We are units of Creation doing that which is expected of us to do to manifest the Man idea in action. We must, however, learn that we cannot forever remain as body in the universe of simulation, or make believe, which motion is. There are intervals in which we must be wholly Mind to learn our part in the drama of Creation. We must then reappear on its stage in many thousands of rehearsals until we manifest the divinity of the Human Idea instead of his flesh alone."

CONCLUSIONS

The living cell and the charged condition of the living body have been emulated in the simple experiment (described in details above) and from the measurements of the electric potential the following main conclusions are drawn:

1. There is a point of stillness in the center of every cell, atom and particle where the electric potential is equal to zero and which is the zero point of the universal space or the black hole with centering zero Mind point in its center, only in expanding phase of its compression-expansion sequence interchange. Motion spins around that still point, but there is no motion AT THAT CENTER.
2. There is an effect of electric current consisting of spinning light rings extending from the still center to convey its power to the other outside conductive matter of the cell.
3. Motion is born from stillness and centered by stillness.
4. Heat is born from cold.

5. The cell, atom and particle are consisting of the light rings spinning around the centering Mind point.
6. The still centering point is the source of energy.
7. Energy is stillness of the eternal space of the still universe at rest and it is changeless. Energy cannot be neither moved nor released. Energy can be expressed in electric potential (defined as a measure of unbalance of a pressure condition) and once started that expression will never stop – it will be permanently repeating.
8. Science is spiritual since Spirit (God, Creator, Mind) is centering every piece of matter.
9. Motion is an illusion which simulates rest.
10. Matter is an illusion.
11. The cause of illusion is division of the WHOLE into PARTS.
12. The mental activity of thinking creates the illusion of motion. Thinking is imagined action-reaction of motion mirrored from a still point to a still point.
13. The thinker is Mind who creatively expresses KNOWING of ONE Idea by thinking it into many seeming parts.
14. God’s mind and Man’s mind are ONE.
15. Human beings are consciousness – we are eternally integrating and controlling existence by moving perception.
16. Desire of Mind for creative expression is the motivating force of every action of human beings.
17. Expression of energy E in time/space P properly describes the fundamental equation

$$E = P_{+-} * C^2 / \text{sqrt}(1-(v/C)^2)$$

where P_{+-} is borrowed and repaid time/space, respectively, and C – **is the speed at which consciousness moves perception - the speed at which consciousness reproduces its own perception of action-reaction (expansion-compression) sequence in the adjacent wave field in reverse,** in our “reality” ONLY – it is frequency of repetition (reproduction) of illusion ONLY in our “reality”.

Everything moves within ME, since I Am Consciousness – God in physical realization.

18. Our senses record a part of the whole and that's why they deceive us. But it is as it should be since we must go out of electrical awareness of our senses (we must become aware of sensed deception) and go into cosmic consciousness of Mind knowing.
