

True Science based on Knowledge

1. The Higher Knowledge

Since becoming aware of God's Presence within Self is the highest goal any human can attain, and all can attain it in the measure of own depth of desire for its attainment - let me get on with HOW-TO and WHY [1].

Material and objective teaching through the senses do not give "knowledge", for the senses cannot acquire knowledge. Intensive reasoning is not intensive thinking, for when people reason through sensed-observation they are but repeating brain memories. Any product of human resulting from the assemblage of sensed-memories is not a creation of the Mind; it is an accumulation of plagiarisms, such as an automobile and most of our world-products. These are inventions of generations of sensed-observers and are forever changing by being added to by others. Mind-creations of a Shakespeare, a Beethoven or a Leonardo are not made that way. Creations of the Mind endure. They cannot be changed or added to by others and yet even those great genius minds will say that "If they saw further it was because they stood on the shoulders of giants come before them."

Knowledge cannot be obtained through sensed-observations. One can merely be informed of effect of motion in that manner. Information is not knowledge, even if it will help to make a better television or jet-plane. Reasoning from such sensed-conclusions misleads one into forming baseless theories and postulates which have no resemblance to Nature whatsoever. That is what the matter with science today is. Well, it is "one" of the things. It is composed of hundreds of theories and postulates which will not only not fit together in one consistent whole but many contradict each other. That is also what the matter with our civilization as a whole is. Its educational ideal is **to stress the physical and ignore the moral and spiritual**. Our entire educational system stultifies the genius who is born with higher knowledge, and many parents of genius children weep because of being thus afflicted. That is also why the conclusions of mathematics are unreliable.

This explanation is necessary for us and other enlightened ones in order to transform ourselves into a higher stage of our unfolding. It is necessary for us to realize that our civilization is still in its intellectual and spiritual infancy. It is still hard-bound by inherited doctrines and barbarian practices of man-exploiting and man-killing. Man is still too near the dawn of Consciousness which released him from his jungle days of universal fear to make much progress toward universal love by the unfoldment of his spiritual and intellectual nature. It is these very practices, doctrines and beliefs which are driving the thousands of more advanced seekers to escape from their traditional, inherited bondage of orthodoxy, superstition and worship of the miraculous. Likewise, it is these many thousands who will become the seed for saving the world.

This we can know because of the hundreds of students who say that they have searched from cult to cult and from leader to leader for decades without finding that which they sought. Many have even been misguided into seeking it emotionally and have suffered the frustrations resulting from the emptiness which follows any other than an inspirational, mental approach. It is this agony of not knowing just what one seeks and just where to find it, and not knowing what higher knowledge means, that is so disturbing to these many thousands whom God has finally awakened into an awareness of His Presence within them. But, next we hear - "OK, already I know that much but how do I get the rest of the way?" The gratifying thing is that if ones are seeking Truth - when they find this material, they KNOW "this is it" - they recognize it at once. The explanation for it is the fact that only Illuminates can bring that higher knowledge to another which they alone possess, and that other must be READY for it before they can even slightly comprehend it. But we are getting there for MANY are now READY.

It is even stranger that I can tell it to ones, for all down through the ages the illumined ones have been unable to tell to others in comprehensible words that which was so clear to them. This one knows without question. For ages, the great leader mystics have told of the "divided and the undivided" without the slightest success in giving the real meaning of those words to human. The brilliant thinking of a century of scientists has never even remotely connected those words of the mystics - the "Divided and the Undivided" - with the universal zero fulcrum of mind and light-waves which emerge from it.

As far back as the Bhagavad-Gita, we have been explicitly informed of that Light which is God, without ever having conveyed any meaning to human during all these aeons. We were also told, "God is Light" and "God is Love". *Man has interpreted His words as meaning the incandescence of suns, and has built an objective God of limited form while still teaching an omnipresent one. The time is now close, however, when human will discover and comprehend that human's Self is as formless and non-objective as is God.*

All of this which is written herein is for the purpose of telling that human first unfolds his physical nature during the aeons of body-forming. His spiritual, mental and inspirational nature began its unfolding at the dawn of Consciousness, which was less than ten thousand years ago, if we accept the findings of authorities on the subject - it matters not - some place it as eight thousand years. From that point of view, it is quite wonderful that the human race has advanced even so far as it has in mental unfolding, even though it is still quite barbarian in its practices and in its beliefs, for human still kills and preys upon his neighbor more than ever in history, and (s)he still believes in a brutal God of wrath instead of a God of Love and Justice. As long as human kills his/her own brothers and sisters by millions instead of loving and serving them as (her)himself, human will be thus. Also, human will still retain (her)his lesser status as long as (s)he believes it possible that (s)he can "sin against God" and *be punished by God for this sinning against (her)his own self. GOD NEEDS NOT PUNISH US - WE DO THAT NICELY FOR SELF.*

These are the things which should be taken into consideration by higher educational and religious institutions, for it is the lack of the RIGHT KIND OF EDUCATIONAL TEACHINGS and THE RIGHT KIND OF RELIGIOUS BELIEFS that is holding mankind back in the dark ages of ignorance. It has never been easy to come into Truth - from finding that the Earth is NOT the center of our solar system to free electricity. The ones who control the masses make sure the information is kept hidden from them.

Emerson expressed it very well, this primal condition of present-day civilization: "We think our civilization is near its meridian, but we are yet only at the cock-crowing and the morning star. In our barbarous society the emergence of character is in its infancy." This is not to be wondered at in a civilization which does not make character growth a part of its educational programs and does, in fact, program the students to have less and less good character.

These things, and more, we must come to now know in order that we can better comprehend the chaotic world situation of today which has been heading toward another Dark Age period for some three-quarters of a century now. This present fall of human is the harvest (s)he is reaping for the seven thousand years of piracy in national and personal empire and fortune building. The entire of the world is in the horrendous reaping of that which has been sown in greed and absence of God.

Ah, and so we have been warned of this decline of human for many, many years and have explained it as the workings of God's law which will not let human keep that which (s)he has taken from another, and will not allow happiness and prosperity to come to any human - or nation - who has taken happiness and prosperity from another for himself - or itself.

For many centuries, one part of the world has endeavored to enslave the other parts of it. The strong have overpowered the weak, and the weak slave has grown strong enough to slay the master. That is what Naziism is. That is what Communism is. The mighty nations of the earth have created Naziism and Communism and Socialism and Zionism to fulfill the law of equal reaction for every action. Impoverished and debt-ridden, tax-burdened nations do not realize that Communism, for instance, is but a mirrored reflection of piracy and a natural consequence of it.

These present decades are a focusing point where the repercussions of centuries of human's ignorance of her/his own spiritual nature are coming to a head. These are the years when human must decide which way (s)he will head for the future without the possible annihilation of the greater portion of the race through atomic war, or a decline of a major part of it into the dark and a renaissance of a minor part of it to a high Cosmic level of civilization beyond what human has ever known. The few who may possibly survive such an Armageddon will give rebirth to the race to keep the Light of Love ever illumined - even as the saints and monks of past ages preserved the wisdom of past ages by hiding it in monasteries and caves until world-rebirth brought them from their centuries of hiding.

History ever repeats itself, but each repetition brings human ever nearer to God. We are facing that kind of transition right now, and God's message to human is an endeavor to sufficiently awaken the whole intellectual world to that higher spiritual knowledge which unfolds the Light of genius in human. Higher knowledge of our universe, which creates cosmic thinkers, is the only remedy for transforming this unhappy kind of world we now experience into one which is founded upon unity in the brotherhood of human. These seem to be very hard words. So, likewise, do the words of the surgeon seem to be hard words when (s)he tells a human that her/his knife must cut the entire cancer out lest the human perish. Our entire civilization is cancerous and we have been commanded to be the surgeons whose first duty is to tell their patients of their ills and the remedy for them in order to avoid death.

This long prelude to the principles of HIGHER KNOWLEDGE FOR HUMAN has been necessary for what we are about to read is very new thinking to which only the one out of many is attuned. All who read what now follows will better comprehend the reason for the dreadful state in which humanity now wallows.

Can anyone who has the courage to look at this civilization of ours squarely in the face say that the world is united into one brotherhood of humen who love and serve each other? Can we actually say that this is the same goal as is offered through the "New World/One World Order" who plans to enslave the masses, terminate millions and rule through Elite horror? Also, can one rightly say that human's love of culture and ethical practices indicates that (s)he has arrived at a high state of intelligence? Does the display of homosexual rape and incest in our art galleries and the hard-metal rock music that lauds Satan and evil show growth into deserving fulfillment within the higher cultures of the Cosmos and Universe?

Following this thought a bit further, who dares, with honesty, to affirm that the might-over-right, survival-of-the-fittest principle of the jungle has become obsolete because of the higher educational and spiritual unfoldment of the God-like humen of today? Before answering this question, look well to the east and to the west around our globe. Look well upon the practices of mass slavery and subjugation of the spirit of human in war-desiring nations. Look even more carefully at peace-desiring nations who are spending untold billions for protections against enemy nations - only to find the enemy has eaten our soul from within! *Look still deeper into the hearts of the peace-loving nations who fear their enemies, and ascertain whether they did not themselves create their enemies by being their enemies.* Also, ask deadly enemies why they become friends with their deadly enemies when other deadly enemies threaten both. Go look yourself in the face in your mirror and see what is REALLY staring back at you. Does that which you see bring joy or pain to your conscience?

We are painting a word picture of the kind of world mankind has created by its thinking thrust into action. As human becomes what he thinks so, likewise, does a world of human become what a world thinks. Is this a true picture or is it not? *If it is a true picture, what right have we to feel that we are a highly civilized, highly advanced and cultured people? And what right have we to assume that our civilized world teachings are right teachings?*

A highly cultured intelligent civilization would be a peaceful and happy one where each human's first consideration would be the welfare of every other human. *Is our world that kind of world?* It would be a world where human values would be first in every human's heart and material values only incidental to them. Love would be its dominant note instead of greed. Friendliness would be universal instead of enmity. Unity would bind all human together, instead of universal disunity in every one of human's essential institutions. *Is this present world that kind of world?*

Everyone who reads and/or hears these words knows full well that every high ideal which we have cherished as a hope for a peaceful world of love has been shattered by human himself until there is but one way of saving the entire human race from another plunge into the dark, and that one way is for human to *become aware of his own divinity by finding the God of Love seated upon Her/His throne of heaven within every human, and discard forever the vengeful God of wrath whom the great masses expect to see coming in a chariot from out of the clouds.*

GOD WILL WORK WITH US BUT NOT FOR US! The Christ will again come to earth in the Christ-Consciousness within every human, and that coming shall be from the kingdom of heaven within human - which all human will someday recognize and comprehend. Christ is not going to come in a flaming cloud as we are told will happen - to rapture away the myriads of those who wash themselves in the blood of a man we murdered 2000 years ago. Christ will not come in a flaming chariot which could but land upon one tiny spot in this whole world of tens of thousands of cities and towns, and tens of billions of other worlds of many towns and cities whose people have never heard of Christ but have, undoubtedly, had similar divine-messenger "Christ-Conscious" teachers.

It is time to ask of ourselves in our own hearts, where human can really find an omnipresent, omnipotent and omniscient God. And it is the first obligation of *every learned human and institution of learning* to help human find that God of Love where the greatest teachers of the world have taught human to find Him.

2. God is provable by Laboratory Methods

The ultimately supreme need of the human race at this stage of unfolding is the discovery of the existence and identity of a comprehensible God by methods and processes which will meet the requirements and standards demanded in the laboratories of science as well as within the heart and consciousness of human [2].

The tragedy of modern science is that it has already made this supreme discovery but is not aware of it. Because of the present-day misconception of the universe, which the Creator built in the image of Cosmic imagining, and of God Himself, Whom religion has pictured as some kind of angry god of wrath who wreaks vengeance upon so-called sinners--instead of conceiving Him as a God of Light and Love--fear has been created by human which leads to war and the preying of human upon human, and is the dominant note upon which our civilization has been constructed. As long as fear dominates the human race instead of love, it will create the disunity which is characteristic of its many religions. When the day

comes that fear leaves human and love enters, the age of slaughter of human by man will end and the age of character will begin.

In human justice, we are not blaming religion alone, for science and religion are father and mother mates--science being the father. All down the ages, man's discoveries in science have progressed our civilization to the point where a man's world is its resultant effect. Man has always been master of the world and man's nature to conquer has always suppressed the love nature of woman.

Deeper still than science, which should have discovered the God of Love (BALANCE), or religion, which created a god of fear and wrath, is the basic cause of human's self-made troubles--and that is HUMAN, (her)himself, who strayed from God's Natural Law at the dawn of Consciousness and has continued to do so to this very moment.

Alexis Carrel was right in saying that all of man's institutions--and these include government, industry, education and home relations--were man-governed and out of balance with themselves and with each other and must, therefore, all be changed to obey the laws of Nature.

The cardinal error of science lies in shutting the Creator out of Her/His Creation [3]. This one basic error topples the whole structure, for out of it all of the other misconceptions of light, matter, energy, electricity, magnetism and atomic structure have grown.

If science knew what LIGHT actually IS, instead of the waves and corpuscles of incandescent suns which science now thinks it is, a new civilization would arise from that one fact alone.

Light is not waves which travel at 186,000 miles per second, which science says it is,--nor does Light travel at all. Science excluded God from its consideration because of the supposition that God could not be "proved to exist" by laboratory methods. This decision is unfortunate for **God IS provable by laboratory methods [4]!**

The locatable motionless Light, which Man mistakenly calls magnetism, is the invisible, but familiar Light which God IS--and with it (S)HE controls HER/HIS universe.

Walter Russell is the most important incarnation all times because he brought knowledge and won approval for his concepts 90 years ago [5,6,7,8,9]. This knowledge is still hidden and forbidden except for the top secret laboratories of the Elite. Bringing this knowledge to the public is of utmost importance because **ONLY KNOWLEDGE CAN MAKE PEOPLE FREE!**

Science has a long history of being wrong. How many times during the history all scientific concepts has been thrown out of the window and replaced with the new concepts? We know that Ptolemy had been erased by Copernicus who had been erased by Galileo. Then came Faraday, Newton, Rutherford and Bohr who thrown all the old concepts out of the window.

True science is based on **knowing the cause**. CAUSE is the desire-energy within Mind to manifest Mind-Idea by extending light-waves of thought from centering fulcrum points. EFFECT is manifested Mind-Idea expressed by motion of extended light-waves of Mind-thinking. God--the Creator--is CAUSE. The created universe of motion is EFFECT.

What if it is time now to throw out of the window all common scientific concepts and replace them with

the true concepts?

3. There is NOT so-called “electrostatic unit of charge”

It has been proven by Walter Russell that we are living simultaneously in two universes: the still magnetic universe at rest which is CAUSE and which can only be known with our Mind (it cannot be experienced with our senses) and the material electric universe of motion which is EFFECT and which can only be experienced with our senses (it cannot be known with our Mind). With our senses we gain information which is upside down of the knowledge because our senses are delivering us opposite of the truth so that all scientific concepts are inverted of the true concepts, except scientific atom concept which doesn't reflect even that virtue. In the electric universe of motion everything is motion, so that so called “*electrostatic unit of charge*” *does not exist* and cannot exist in the universe of motion – everything what is static belongs to the still magnetic universe at rest. Having said it the whole scientific theory about electricity falls in water!

4. The True Particle Concept

In the vacuum gas discharge phenomenon (Figure 1), it can be seen clearly that the electric current in form of parallel light rings are extending from the cathode to the anode (not electrons as balls or spheres), like buttons strung upon a thread. In the beginning of the discharge it is clear to see an instable phase with light rings spinning very fast around their own centers until a stable phase is established where those rings are at 90 degrees from the shaft

Figure 1: Gas discharge phenomenon going through the centers of all rings.

Generally accepted in science is that the atom is a basic unit of matter that consists of a dense central nucleus - containing positively charged protons and electrically neutral neutrons - surrounded by a cloud of negatively charged electrons moving around the nucleus.

To charge means to be added to. Meaning of the word “negative” is to negate, to void, to empty or become minus. So, “**negative charge**” means literally “**added to by subtraction**”! Does it make sense?! What “negative charge” means at all? How can something be “negatively charged”? There is **charge** and **discharge** ONLY!

From the Figure 1 it is obvious that light rings are moving, but not some nebulous electrons like small spheres or balls.

If Science really knew what electrons are, it would not sustain that theory for one second. Electrons do not revolve in orbits around any nucleus which does not exist. They spring from the zero inert gases of their octave toward a nucleus in the first element of their fourth octave--as lithium springs from helium--then multiply in cube ratio at each step toward carbon.

5. The True Atom Concept

A group of scientists of the Central Scientific Company, of Chicago, has used an instrument called the Cenco-Muller Field Ion Microscope in order to magnify the tungsten atom 2,700,000 times and make it visible (Figure 2). The Figure 2 shows clearly that it is possible to look directly at God in the laboratory. The very center is absolutely black – there are no protons and no neutrons there. I have magnified the very black center of the picture on left and have shown it on right as a smaller black square. It is obvious that there are NO protons and neutrons in the so called nucleus of atom, and there are NO phantom “negative charged” particles called electrons. And there are no phantom nuclear forces coming out from the nucleus. Those forces and power are Spirit power sitting in the center of every atom and extending power in the measure of the DESIRE of Consciousness for creative expression.

Atom consists of rings of light spinning around the centering Mind point which is the source of energy and from which the light rings borrow energy in order to be able to move. It was experimentally proved that in the center of every atom there is a still intelligent point which God Is [4]. This still point is the source of energy which is centering every piece of creation.

The common scientific atom model is a big tragedy: it violates all laws and principles of Creation of matter [10]. There are no particles, or groups of particles, which hold the atom together as nuclei. Gravity does not work that way. All creating matter is centered by holes of space except one element in each octave. The energy of Creation centers each note. That centering, invisible, omnipotent Energy is God's mind and our Mind. Naturally we cannot see it, but we can KNOW it, for it is our Identity, and our Intelligence. It is the Source of our creations as it is the Source of all Creations.

Figure 2: Photomicrograph of pure tungsten crystal magnified 2,700,000 times. On the small picture right is shown the very center of the big picture magnified – there are NOT protons and neutrons to see there and to count!

6. The True Cell Concept

It is well known phenomenon of so called “sickle cells” [11]. It appears under a microscope that the red blood cells of the balanced body are microscopic rings with holes in the center (see Figure 3), whereas different disturbances which sufficiently upset the balance of the body metabolism will break openings in these rings and make them appear to be sickle-formed so that the little white discs which constitute the red corpuscles of the blood appear to have frayed edges, as though they were moth-eaten.

Everyone who is not blind can see from these pictures that the cell consists of rings of light spinning around the centering zero Mind point.

Figure 3: A - balanced red blood cells,
B - sickle cells [11]

Recent blood test: balanced cells (left) and imbalanced cells (right)

7. The Coulomb law

The Coulomb Law statement that opposites attract and likes repel IS NOT TRUE TO NATURAL LAW!

Opposite conditions ARE opposing conditions. Likewise, they are opposite effects caused by each pulling in opposing directions. It is not logical to say that opposites fulfill any other office than to OPPOSE. Nor is it logical to say that opposing things attract each other.

The basic underlying law in nature is: SAME CONDITIONS ATTRACT EACH OTHER!

If the opposite poles of the famous “bar magnet” were attracting each other, they should be found in the middle, but they are at the very ends of the bar – as far from each other as they could be! It is the high imbalanced state at both ends of the bar, or the high electric potential, which force these poles to move to each other according to the universal law: SAME ATTRACT EACH OTHER [12]!

8. Sense deception and Mind knowing

In science is believed that motion is two directions as our eyes see it, but it is deception of our dual senses which divide one direction of motion into two opposite effects which our senses perceive as opposites.

TO EXPLAIN HOW UTTERLY IMPOSSIBLE IT IS FOR THIS TO TAKE PLACE IN NATURE, AND TO SHOW HOW EASILY THE SENSES CAN BE PERSUADED TO BELIEVE AS FACTS THE VERY OPPOSITE OF WHAT IS FACTUAL, I HAVE TO GO BACK TO THE UTTER SIMPLICITY OF THE FUNDAMENTALS OF OUR UNIVERSE AND LEAD UP TO A COMPREHENSION OF SUCH AN IMPOSSIBILITY. Let me do this as simply and briefly as possible. In other words, I will return to the electric current and consider just one cycle of electric current.

Therefore, I first postulate the basic fact that, *in this entire universe, there is only one direction to motion, but that one direction produces two opposite series of effects.*

Rain falls to the ground and rises as a vapor. That seems to be two directions. A cyclone is anti-clockwise in the Northern Hemisphere and clockwise in the Southern Hemisphere. Right-handedness and left-handedness, up and down, in and out, hot and cold, life and death, expansion and contraction, and a hundred other opposite pairs of effects are produced by one direction of motion in this pulsing universe. If I had to clarify this idea in the simplest way possible, I would take a pencil and a large piece of paper, then begin drawing a closing spiral, clockwise, starting slowly from way out into space, and increasing his speed continually, without changing direction, until I got way out into blank space again. I would keep on repeating that operation over and over again, without changing direction (Figure 4).

*Figure 4: Simplest demonstration of
sense deception*

Our bodies are “receivers”, just as our short-wave radio trans/receiver devices. EVERYTHING is energy, whether or not we can perceive our experience as such. The “solidness” of “things” around us is a manifested effect caused solely by our senses. ***God designed human’s senses to reflect only A PART OF THE WHOLE.*** For if we saw everything at once we would detect no movement at all, we would KNOW THIS ILLUSION FOR WHAT IT IS. And exactly like our cinema projections, when we witness a series of STILL PICTURES one frame at a time, each followed by black space in between, the illusion becomes LIGHT, ACTION, SOUND - MOVEMENT THEN “SEEMS” TO BE HAPPENING. We know, however, that when we watch a motion picture, the events unfolding on screen are not there. It is just one still picture followed by another still picture. In God’s Cosmic Cinema SPACE IS THE BLACK SCREEN OR BACKGROUND FOR HIS HOLOGRAPHIC LIGHT, WHICH IS HIS THINKING manifested in 3-D/Three Dimensional “hard” seeming “Reality”.

It is a commonly known fact by every physicist and laboratory worker that electricity runs only in the direction of the turnings in a solenoid coil. Every such worker is also perfectly familiar with the effect of polarization which evidences its effect at 90 degrees from the direction - and plane - of the electric current. These two seeming directions, and effects, are confusing to him/her for the idea of polarization, as an extension of stillness, has not yet entered his/her thinking. ***It is new thinking but it must come a day of realization that a three dimensional universe is only an illusion caused by polarization, and that there is no motion, whatsoever, in the direction of gravity shafts, which contribute to the three-dimensional illusion.***

EFFECT can only be experienced by senses, but cannot be known by Mind, whereas CAUSE can only be known by Mind, but cannot be experienced by senses.

out-breathings then divides it by expansion. To designate this effect of compression-expansion sequences by electric terminology such as positive and negative charges is totally unlike Nature's processes of creation of matter. It overlooks the fact that these action-reaction sequences are interchangings between the heat and cold of the divided spectrum of matter. Our laboratories are unaware of the fact that they are unknowingly on the way to discovering the transmutation process, for that process demands the power and knowledge to control gravity in such a manner that they can compress or expand it to high limits.

Now I would now like to write what seems like an insoluble paradox, or an impossibility of Nature, but it is a fundamental, nevertheless. It is as follows:

All material bodies, organic and inorganic, live and grow by increasingly fast motion. They also die and decay by increasingly fast motion.

This eternal fact of Nature has always stared Man in the face very conspicuously, without having been seen. Even so great a thinker and observer as Dr. Einstein passed it by when he wrote his equation of 1905, which states that fast motion multiplies electrical potential. The fact in point of Nature is true, but as it is equally true that fast motion divides potential, his whole equations are invalid as a LAW, for a half-truth which voids itself CANNOT become an ETERNAL LAW.

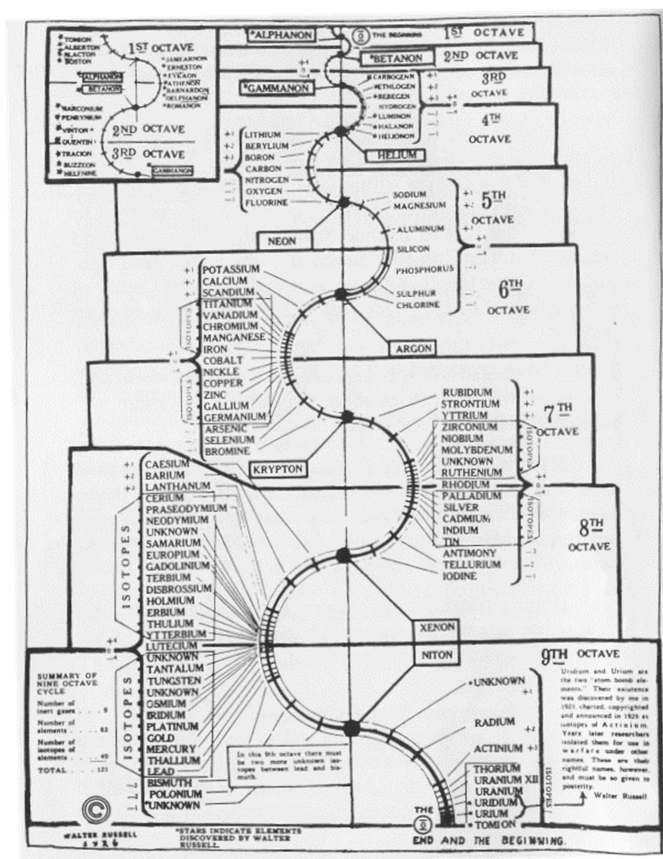

Figure 7: W. Russell's Periodic Chart of Elements

It is not to be wondered at that this fact of nature escaped observation by the senses, for Man is so accustomed to the fact that effects disappear through slow motion, and that death is consummated by cessation of motion. The senses are not to be trusted, however. When we fully understand the above postulate we will also understand the incredible death speed of plutonium radiations which are approximately 170,000 miles per second.

The speed of light is 186,400 miles per second. That is the generoactive speed in which light waves reproduce to create living bodies of matter. In the creation of matter the generoactive, polarizing, centripetal speed which multiplies to create solids, begins with zero at the first octave and reaches its maximum generoactive speed of 186,400 miles per second at carbon, which is the maturity of Creation. This is the increasingly fast speed which multiplies potential. It is

centripetal. From there begins its radioactive, depolarizing, centrifugal speed at zero and reaches 186,400 miles per second, just beyond plutonium at the amplitude point of the 9th octave wave. This is the increasingly fast speed which divides potential to assist matter to die. It is centrifugal. Up to nearly that point the word fusion has taken the place of combustion, but beyond it the speed of death is so great that the word fission has been coined to meet it. The speed of flame by fission causes one short-circuits in about one hundred millionth of a second. Its actual speed could be computed by dividing the speed of light into the time it takes for one wave frequency.

So please, let me review what was projected here. Let me make it easier to comprehend by telling it simply and in easy stages. As a step in this direction you must know that life in a Man's body is exactly the same as life in the car battery. As long as its electrical charge exceeds its discharge it lives and grows with increasing vitality. When its discharge exceeds its charge it loses its vitality and slowly dies. This is as true of a flower as of a man, or atom, or flaming sun.

Figure 8: The vertical section of the cyclone illustrates both compression and expansion processes of Nature which are in every effect of motion, inbreathing and outbreathing, life and death, growth and decays, and many others

All things live and grow because of their ability to generate enough heat to charge their bodies with their normal voltage, and no more. Each living body has a normal temperature and pulsation frequency which must be constant in order to live and grow. Death begins with the slightest upset of that normalcy. Even one degree of extra heat beyond 98.6 will upset the entire metabolism of man's body. That one degree of fever is one fifth of his way to death. That is equally true of everything.

The term "magnetism" is also unjustifiable. The word GRAVITY should be used instead, for gravity both multiplies and divides by thrusting inward from without to compress and outward from within to expand. In this manner, gravity controls light by controlling its curvature, and Mind also controls gravity by limiting both outward thrusts to the cube mirror planes of zero curvature which we will make much of later on. (See Figure 8) This is in complete opposition to the Newtonian law of gravity which claims that gravity pulls inward toward a center and that matter attracts matter. It is also in opposition to the

second law of thermodynamics which claims that energy cannot run uphill but only downhill.

The nature of Light is to give outwardly from itself in accordance with the love principle upon which the universe is founded. The more Light of love that Nature gives out from itself in the one and only direction of motion, the more intense is that light and heat. The opposite reaction to giving is not **receiving**; it is **regiving**, as life gives to death and death regives to life.

Factually, there is no inward pull of light toward a center nor are there such effects as attraction or repulsion of matter (meaning light) to other matter. This statement will cause a storm of protest from scientist and layman alike, but if both will withhold judgment until they read about Coulomb Law Misconception [12], that mystery will be dispelled.

No scientist can create energy by pulling in inward from within.

It must be produced by thrusting inward from without, as an automobile tire is pumped. That means by compression. If the tire were made of a metal which could not be burst by that compressive inward thrust, it would cause it to create a ring of intensely hot visible light at its center and density would then increase inwardly, as stars and planets increase their densities in the inward direction. Science has already done this but does not admit that the energy thus created was **projected** into it, for science claims that matter itself is energy.

The process of creation of matter requires thrusting outwardly from the cold space toward the inward direction to generate heat, and then thrusting outwardly from within to radiate heat back to cold space. Witness the tremendous of thrust of heat from the solar corona.

All matter is composed of light rings in which their density increases from the inside holes toward the outside rings. The blue of the spectrum centers these holes and the red of it occupies the outside. For a good example, see a color photograph of the Lyra ring. When compression closes these rings, they become spheres in which density increases toward the center and the white hot yellows and reds of the spectrum centers them. Holes then develop on the inside as the rings radiate their heat into cold. Thus the light wave cycle is created. Good example is Saturn's rings.

Who doubts all that is said above, can see on the picture below that NASA recorded somewhere in the universe. One can clearly see the light rings from both sides and the incandescent sun in the middle.

10. Consciousness moves its own Perception

I define time as the duration between events of generation and degeneration, but it is a variable inseparable from space which I define as an imagined screen within me (I am Consciousness) at which I have been projecting My perception of motion. Time/space is one variable which is creating GRAVITY – the sucking effect, as the measure of my desire [10]; either it sucks down to a smaller or up to a bigger volume, or achieves the realization of any potential, any life circumstance.

I will use the letter P to denote time/space as one variable to remind us of our perception.

Now, having in mind Einstein's equation which properly describes the generation (compression) phase of the creation, I have just added to his equation the missing degeneration (expansion) phase of the creation in order to describe the full expansion-compression cycle of the creation:

$$E = P_{\pm} * C^2 / \sqrt{1 - \left(\frac{v}{C}\right)^2} \dots\dots\dots (3.3)$$

where P+ is borrowed credit of time/space and P- is repaid debt of time/space, both measured (quantified) as electric potential.

In my humble opinion the above equation is the first equation ever that deals both with the cause and with the effect and that is its utmost importance. This equation is a doorway into Omni physics of the next 500 years.

Let me now integrate and honor the past perception of my beloved aspect Albert Einstein, Figure 9.

Figure 9: Einstein vs. Laki

Logically C must be velocity at which energy is expressed in time/space. Or, C is speed at which Consciousness moves perception – “speed of perception”.

C – is the speed at which Consciousness moves perception - the speed at which Consciousness reproduces in reverse its own perception of the action-reaction (expansion- compression) sequence in the adjacent wave field, in our “reality” ONLY – it is the frequency of the repetition (reproduction) of illusion ONLY in our “reality”.

From the Figure 9 one can clearly see that blue and red line, which are describing the expansion-compression sequence of creation, are symmetric relative to v/c axes and they are voiding each other at every step of their unfolding and

refolding process so that only the eternal zero is existing eternally.

Einstein's equation was pretending to describe radiation, according to the official scientific concept of Big Bang and the ever-expanding universe, where there is NO compression. But, it turns out that the equation describes non-existing compression (see Figure 9) according to science. Since all three concepts, (of mass, of energy and of speed of light) were wrong and since it describes only one part of creation cycle, the equation is not valid. The half-truth cannot be the truth, even if we neglect the fact that the equation describes the part of the creation cycle – compression – that was unknown to Einstein.

10.1 Existence

Let me consider existence existing as an open-ended electro-plasma, always evolving through its interacting matter (M) and energy (E) fields or modes. Those two fields of existence also eternally interchange (sequence of expansion-compression) in a relationship whose compression sequence is expressed by Albert Einstein as $M = \frac{E}{C^2}$ in 1905, with C being the universal constant representing the speed of light.

Existence MUST EXIST - it cannot NOT exist. Moreover, no vacuum void of existence is possible. "Vacuums" of the *matter* field can exist as in outer space, in vacuum-pumped containers and in areas between electrons. But, all those volumes are FILLED with the generally **unmovable**, frictionless **ENERGY** ether or field - a **uniform**, continuous field of energy.

Einstein's concept of mass was wrong. Every unit of mass consists of light rings spinning around the centering zero Mind point and it is an imbalanced condition and the proper measure of the imbalance is electric potential. Those light rings spinning around the centering zero Mind point are My perception of time/space motion (perception of Consciousness), so that I can replace "matter" M with "time/space" P.

Each component part of an equation needs a label. Now, as with $E = P * C^2$ or whatever - WHAT IS "C"? To Einstein, it represents the universal constant which represents the speed of light. It SHOULD REPRESENT "Consciousness" - THE SPEED OF CONSCIOUSNESS - NOT LIGHT, IF I AM TO BE ACCURATE!

Then what really is the "speed of light", C? First, consider atomic fission or fusion in which all of a given mass (actually time/space) is converted to energy as $E = P * C^2$. That is the action or expansion phase of every creation, because action is always giving from the centering soul which means outward expression. Now, by contrast, the "speed of light", C, is the velocity at which all of a given energy is converted to mass (actually to time/space) as $P = \frac{E}{C^2}$. That is the reaction or compression phase of every creation, because reaction is always re-giving, which means inward compression. Yet, light itself is the opposite - it has no mass. So where is the connection of light to the velocity, C? There is NONE!! The "speed of light", C, is NOT THE SPEED OF LIGHT AT ALL, BUT RATHER "C" IS THE VELOCITY RELATIONSHIP BETWEEN TIME/SPACE AND ENERGY FIELDS. LIGHT, GRAVITY, Mr. Einstein, AND CONSCIOUSNESS ARE INTER-RELATED. THEY HAVE NO PATHS OR SPEED LIMITS.

We know now that Light does not travel at all, but that Light is simulated in light which reproduces itself in surrounding bodies. There is only ONE Light that seemingly is two. We can imagine a mirror-walled room with a light in the center. The mirrors would reflect into each other, and the thus reflected light would APPEAR to extend into infinity. But it would be the same light! Just as a man can have two hands, belonging to the same body, God can have two or more EXTENSIONS OF HIMSELF, and yet it is still just the One. We only THINK of ourselves as separate entities, in reality we are One in God.

The still One Light of equilibrium is simulated by both its seeming division into light expansion-compression (action-reaction) sequences and the reproduction of those sequences is at the rate of 186.400 miles per second anywhere in our part of existence.

Finally, C is the speed at which Consciousness reproduces its own perception of action- reaction (expansion-compression) sequence everywhere in existence – it is the frequency of the repetition (reproduction) of illusion everywhere in existence. This justifies calling it the "speed of perception".

10.2 The amazing supreme proof

There is no better irrefutable proof for the claims that we are Consciousness, that Consciousness moves perception, that Man's Mind and God's Mind are One, that desire of Mind is the main motivating force in this universe, that motion and matter are an illusion as well as that the cell consists of the light rings spinning around the centering Mind point, than the amazing teachings by example of a Dutch named Arnold Gerrit Henskes whose pseudonym was Mirin Dajo [13]. He claimed that his body was invulnerable and he proved it many times by piercing his body with a sword without injury, even through his heart (see Figure 10 as well as this [link: http://mirin-dajo.com](http://mirin-dajo.com)).

Figure 10: Amazing teachings by example

Dajo taught that people should abandon the materialistic world view and accept that there is a higher force - the Source - and that God was using him to show us through the invulnerability of his body that there is something better out there and that materialism only results in misery and war.

What is the difference between the Dajo's Mind and the Mind of a layman?

Both Dajo's Mind and a layman's Mind are One with God's Mind and are omnipotent and therefore can do anything what they accept as truth. The Layman's Mind accepts as truth that his/her body is real and that a sword would injure his/her body or even kill him/her (because he/she heard it or saw it) and his/her Mind provides for it to happen if his/her body is pierced with a sword. Dajo's Mind knows that both his body and a sword are an illusion, he is aware that the power of desire of his Mind (which sits both in the center of every one of his cells and in the center of every atom of a sword) decides about the outcome of interaction of his body with a sword so that he has decided that nothing happened! In other words, Dajo allowed his Mind to function properly in actual thought projection so that a sword striking his body had been hardly noticed, whereas the Mind of a layman is convinced of the ability of a sword to injure and kill and the body reacts as directed - if struck appropriately, it dies.

Dajo had been aware of the power of the desire of his Mind. He had been aware of himself as the still observer of his experiences. He had been aware that he as Consciousness had been moving the perception of his experiences with a sword and that is why he had been able to control it absolutely.

11. The Practical Value

If what is given herein with its diagrams is received with open minds, it will advance the knowledge of the human race and its consequent higher status and completely change the perception of Human in less than one generation. When it is accepted we will find ourselves already living in that advanced civilization.

It was Walter Russell who brought the knowledge, but some of us will read it and say, "Well, then it's hardly 'new' because Russell is long dead". How many of us understand it from the time Russell shared it as he brought it forth for us? I thought so--hardly anyone! Our world would have already been turned about and headed toward God if we had understood. Most of readers will have never even HEARD OF RUSSELL. Ah it's indeed sad for these humen came forth out of their time--to test the readiness; and have always found it lacking--I hope it happens not this time also, for our sequence of events precludes further "dragging" opportunities. NOW IS THE TIME, HUMAN BROTHERS--IT IS "MAKE IT" OR "BREAK IT" TIME.

Many laboratories have been on the way to a solution of the principle of transmutation but, unfortunately, are unaware of it. Furthermore, they have also been on the way to the control of gravity, which a certain distinguished scientist said would climax all discoveries by giving human an unlimited command over matter. **Science has long ago been in control of gravity but is, unfortunately, also unaware of that.**

Let us consider this by giving a few examples. One conspicuous example is the projection of satellites into gravity-free orbits around the Earth. More conspicuous still is the demonstrated fact that astronauts can accompany those satellites and reduce their speed at will in order to lower them to the ground where ground forces can control their areas of landing. The very fact of ground crews knowing where they are at all times is another conquest of gravity. To be able to talk to them from thousands of miles away is still another conquest for, heretofore, human has been able to talk to others only by wire until radio, television and radar had been discovered. I use these examples for these are what we-the-public are allowed to see and know. There are incredible things which are hidden intentionally from us and yet there is no use utilizing those things as example for we have nothing with which to relate the information.

This all grew from the conquest of gravity by the airplane itself. Such a miracle would have been considered an impossibility during the end of the last century.

What greater miracle in the conquest of gravity could be thought of by human than the power to hurl rockets and explosive missiles thousands of miles into space and to control the spot on the other side of the earth, or across its poles, upon which their projectors desire them to land? Equally great is the power of an adversary to meet those missiles, which they can find in mid-air at great distances from their point of projection, with others.

The conquest of gravity by liquefying gases, even to inert gases, is still another seeming impossibility for it is a reversal of Nature's process of heating, even as the freezing of soft metals to harder ones of greater conductivity is further evidence of the increasing power of the Mind of human.

Even the ability to create the fuels which hurl these missiles and satellites is another one of human's miracles. It is also a transmutation process for it divides the very elements to get that part of them which serves their purpose and discards the other parts.

As a last example of the many uses which could be cited of gravity control is the power of science to take from the high octave elements, such as zirconium which gravity has multiplied by its compression power, and make them into transistors. These do thousands of times as much as the old "electric" storage batteries do, but no scientist would think of GRAVITY as being its CAUSE. This is because science thinks of gravity in the Newtonian concept. Manufacturers of computers have been enabled to do great things with gravity and simplify their machines because of it. They, too, however, are unaware of the true nature of gravity.

Up to a century ago, human had not begun to make any conspicuous use of the power to control gravity. God alone had that power. When the steam engine was invented, that God-power began to multiply in human. That is what God intends for human who was created to manifest his Creator on Earth. **God's**

highest goal for human is his own omnipotence and omniscience. Human already has God's omnipresence, for his every thought and action extend to the farthestmost star and end in (her)himself. That includes their unity with every other human on Earth--and this spells out the brotherhood-of-human relationship.

The tragedy of present-day humanity is that mankind is not aware of its power nor of its real Source, for if it were aware of these things human could not possibly slaughter other human in (her)his barbarous unholy wars.

My personal challenge is to copy in laboratory God's principle of creation with which God multiplies cold space into incandescent suns of enormous temperature – an amazing source of energy - in order to create desired new material forms (new species of fruits, vegetables, etc.). I intend to develop this principle of creating my own patterns by starting from zero without interference from other pressures and patterns, and then multiplying them by gravity control within them.

The same principle could be applied to create a continuous source of unlimited electric power – something that could substitute any currently existing source of electric power.

Conclusion:

Everything is possible with KNOWLEDGE! ONLY KNOWLEDGE can make us people free!
